

RESOLUTION
Emergency Green Ramp Repairs and Reconstruction

WHEREAS, a vehicle recently struck and severely damaged a sixth-floor concrete barrier panel at the City’s Green Ramp; and

WHEREAS, the damage to the sixth-floor concrete barrier panel was so significant that it presents an immediate danger to the public health and safety and further threatens to deteriorate into a more significant danger without emergency repairs and reconstruction; and

WHEREAS, Wisconsin State Statute § 62.15(1b) allows for the Finance Committee, as a board of public works, to determine that an emergency has been created by the damage or threatened damage to a public facility in which the public health or welfare is endangered; and

WHEREAS, City staff have identified a qualified contractor that can immediately begin addressing the emergency repairs and eventual reconstruction of the damaged barrier panel through emergency procurement; and

NOW THEREFORE, BE IT RESOLVED, that the Finance Committee determines that the danger to the public health and welfare from the damage to the sixth-floor concrete barrier panel at the Green Ramp creates an emergency for repair and reconstruction to a public facility pursuant to Wis. Stat. § 62.15(1b).

Adopted this 7th day of August 2024.
