RE: Request to install groundwater monitoring well  
306 West Washington Street  
Appleton, Wisconsin

Dear Mr. Buetow,

PSI was retained by Gannett Satellite Information Network, LLC, Ms. Kathleen Hennessey, to do some environmental work for the Crescent Lofts Apartments (306 West Washington Avenue, Appleton, Wisconsin). We are requesting to perform a monitoring well installation in the alleyway between the Post Crescent parcel and the Hoersch Appliances property. The well will be approximately 15 feet deep. We are hoping to install the well in the next couple weeks, currently proposed for October 18th and take samples this month and in the winter. We will contact Diggers Hotline prior to drilling. Attached is a map with the proposed location.

Please don't hesitate to call if you have any questions (920) 745-2200.

Respectfully submitted,  
**PROFESSIONAL SERVICE INDUSTRIES, INC.**

Hi, Paula;

Attached is the new map with the proposed monitoring wells. The contractor says there is about 3 feet between the building and the sidewalk, so we should be able to install the well in that space.

No problem. I'll wait for updated map.

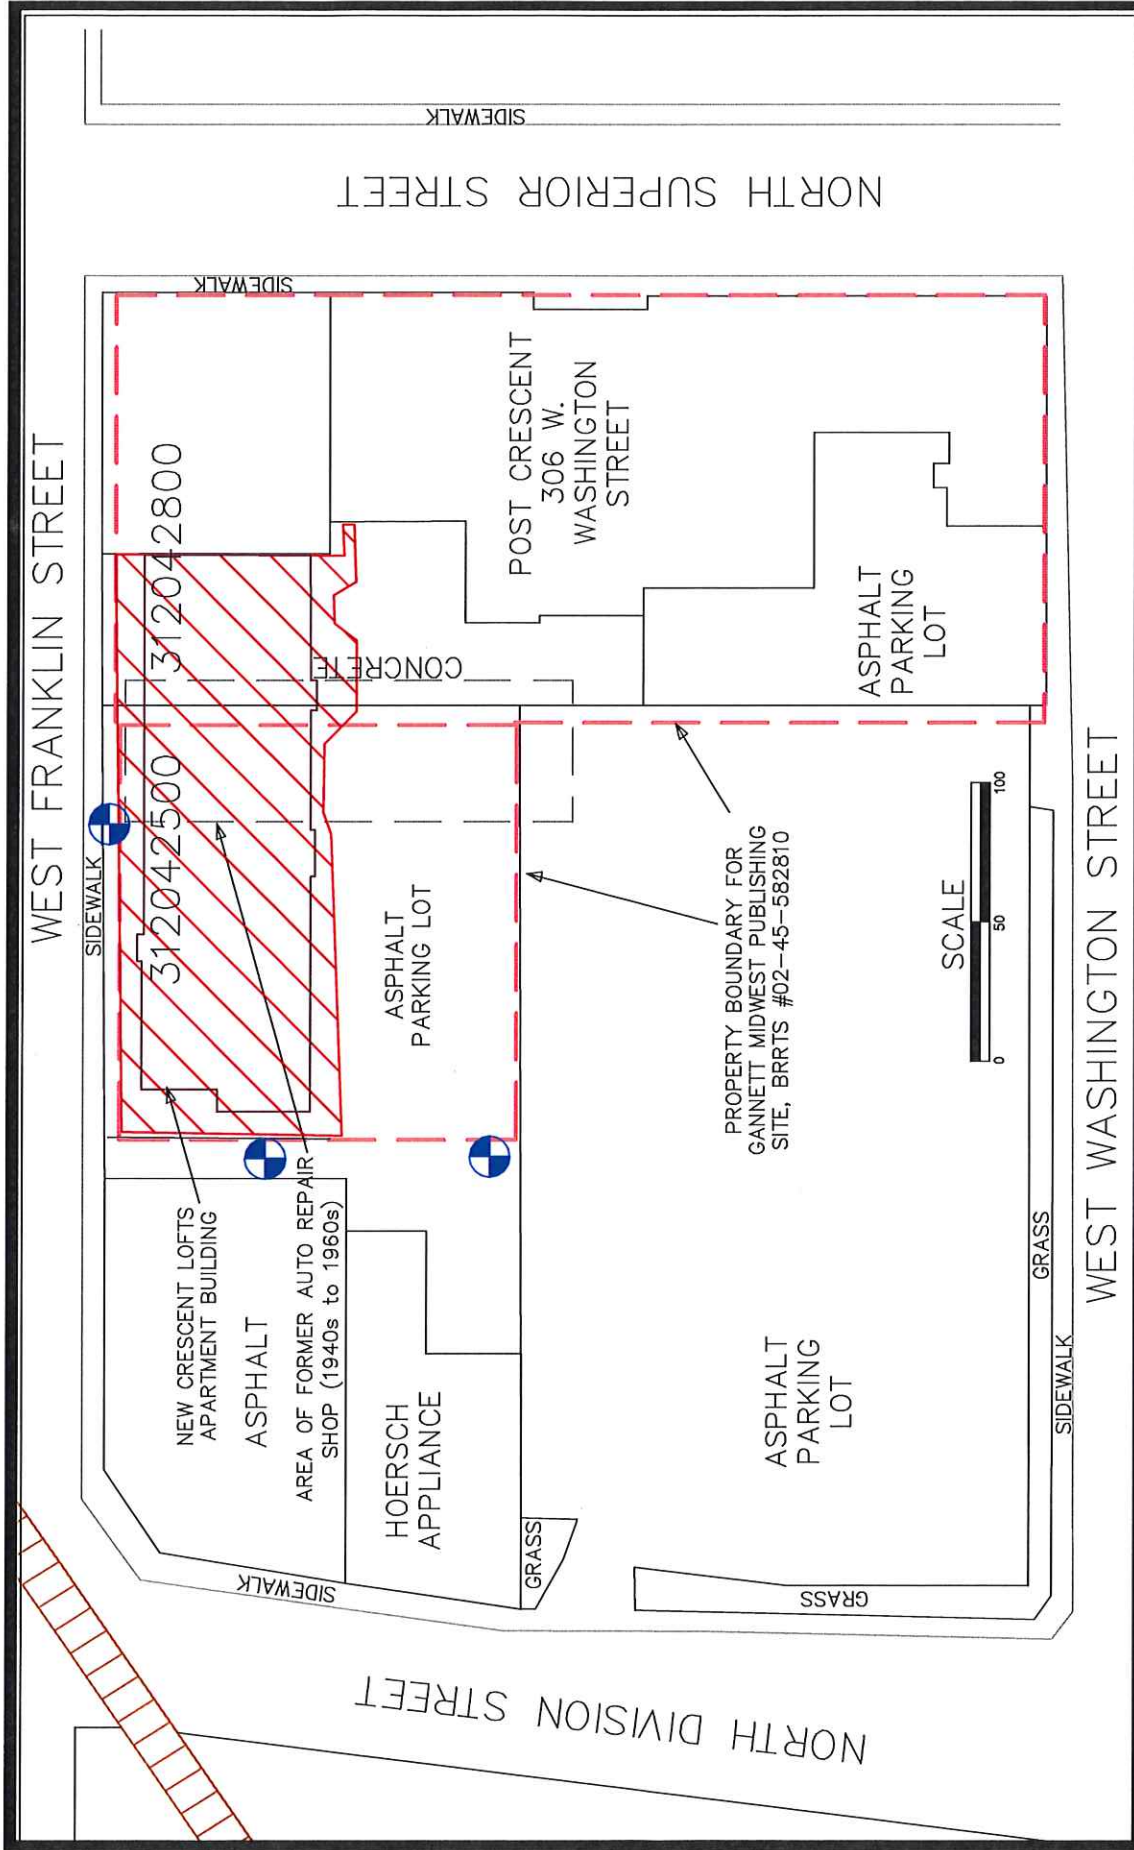

Paula

The DNR actually wants two monitoring wells. There will be another proposed about 50' to the north along with the one that I sent to you. I will send you a map with that one on hopefully tomorrow once approved. Sorry for jumping the gun. Thanks!
