JOB: AWWTP-NEW MAIN SUBSTATION UPGRADE- # 186102-II

Kurt,

Per our Recent Phone Conversation, we discussed the Electrical Permit Fee for the above listed job that we were recently Awarded, The job was broken down into Five Major Electrical equipment purchases which included:

- 1-One New PDC Structure which includes all the 5KV Switchgear and accessories
- 2-Two 35KV Switchers
- 3-Two 35KV to 5KV Transformers
- 4-Two Large Capacitors Banks
- 5-Two Neutral Grounding Resistors

the above Purchases were \$2,107,000.00,

The remaining portion of the job is the Electrical Installation by Van Ert Electric, this would include purchasing of materials needed such as Conduit, Fittings, Wire, Tools, Equipment, Testing services, Labor and Supervision, this portion of the Job is \$193,000.00, at Bid time this is the amount we used for the City of Appleton Electrical Permit {Approximately \$1,500.00}

If the City bought the Big 5 listed above the City nor the Contractor would be responsible to pay Permit monies for this,

We have know problem with the \$1,500.00 Permit Fee and would like to get this approved as soon as possible so we may proceed, any questions you can contact me at 920-450-5271
Thanks

Phil Rabideau
Project Manager
Van Ert Electric, Inc.
