AQUATIC DESIGN CONSULTANT: Water Technology | Beaver Dam, Wis.

COST: \$7.5 million

SQUARE FOOTAGE: 16,000 (water surface area)

OCCUPANCY: July 2017

SOMETHING MORE

Conceived as a splash pad to replace an outdated competition pool, Erb Park benefited from strong community support for a facility that would become more than a pool or a splash pad. The new Erb Park Pool offers a competition pool with two diving boards and basketball hoops, along with an activity pool featuring amenities for youths, tweens and teenagers looking to develop skills and social interaction. A water-slide tower with two body slides caters to thrill-seekers.

NATURAL DECK DESIGN

The concessions and changing rooms are close to the entrance and toddler area, facilitating parental supervision. A tremendous amount of deck space is filled with inviting shade and seating. Small hills on one side of the park provide an inviting expanse of green grass and newly planted shade trees. A band of open-sided shade structures and gardens between the competition and leisure pools creates separate spaces without adding fences or solid barriers. All of these “back to nature” elements are designed to make the park more than just a collection of pools.

COMPONENTS

- Eight-lane, 50-meter competition pool
- Leisure pool
- Interactive water features
- Tot slide
- Zero-depth-entry pool
- Sun turf
