

Appleton Health Department 2023 Q1 Report

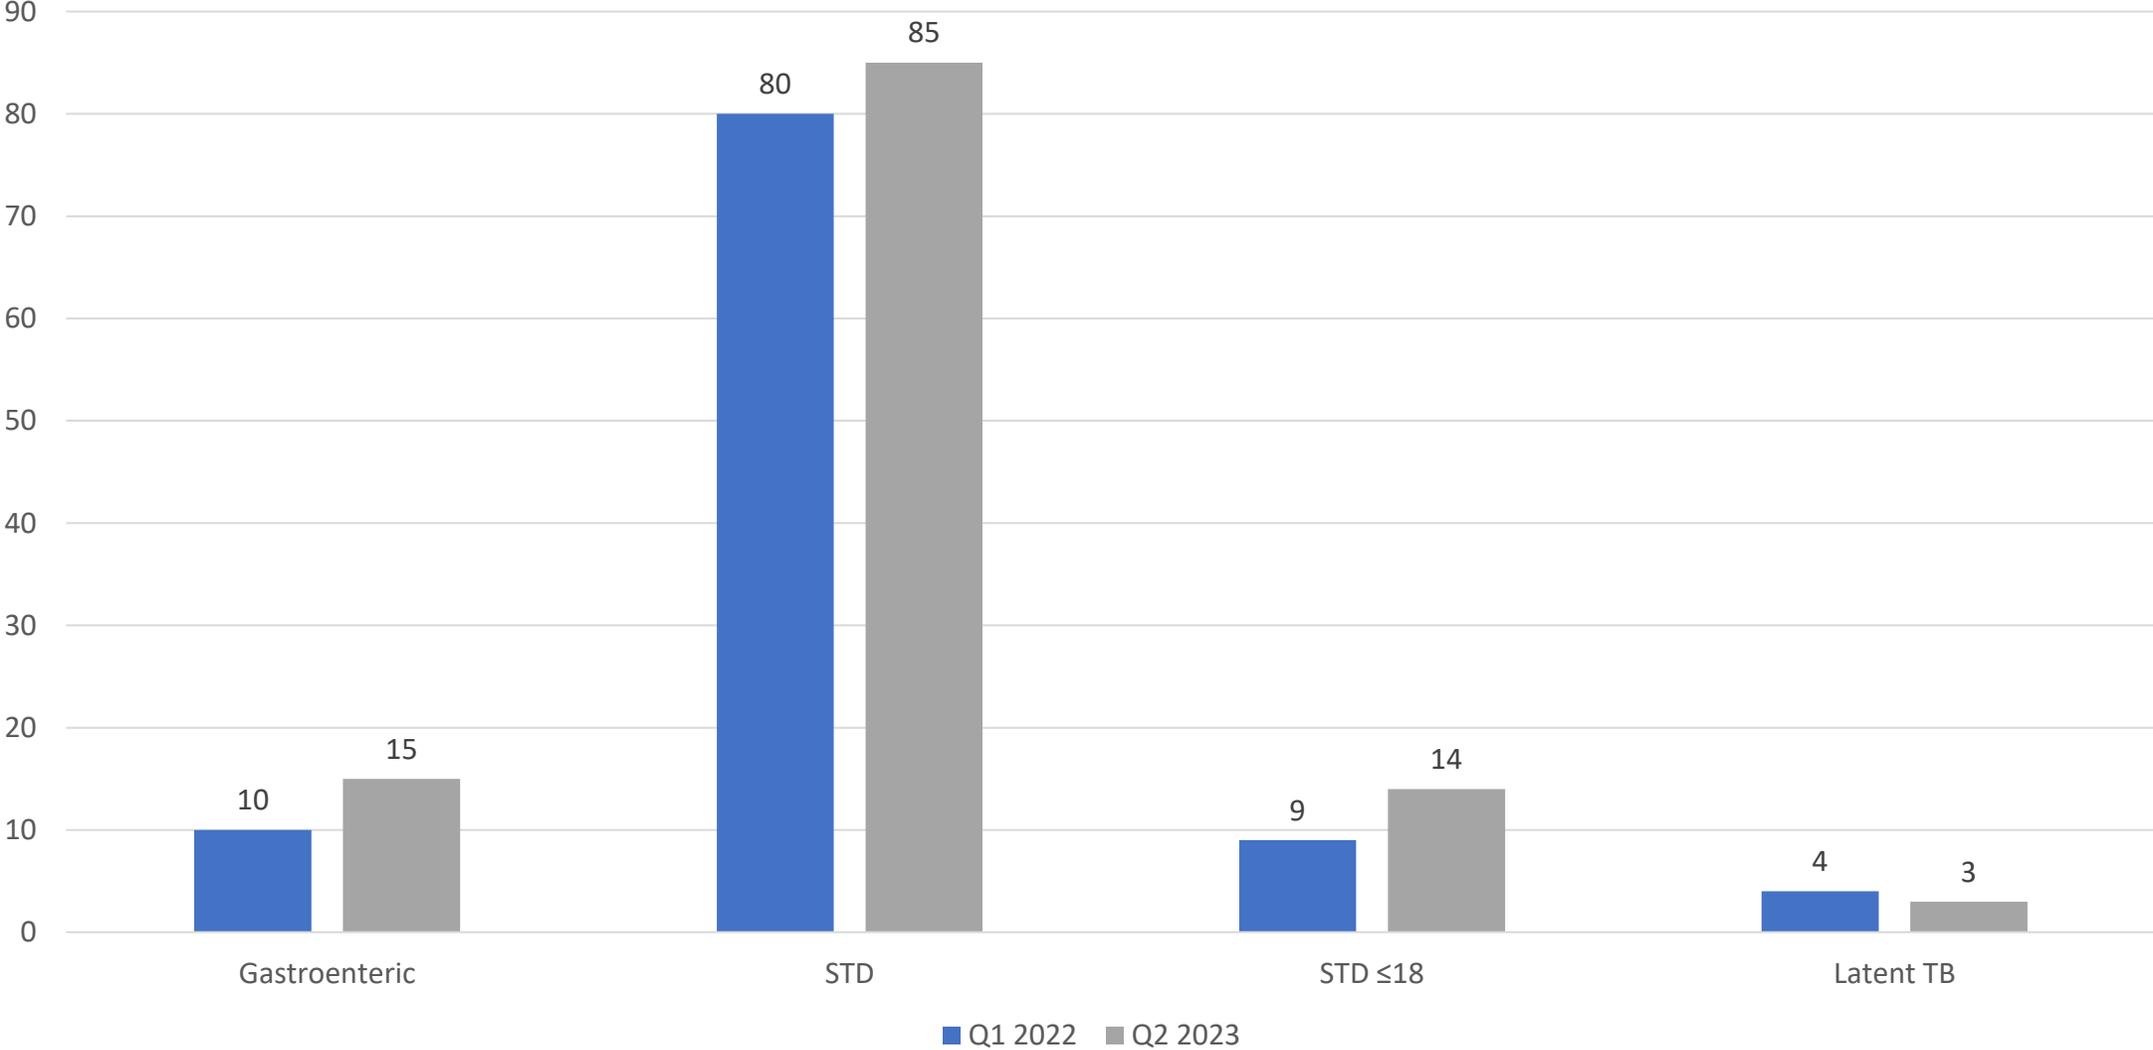

Public Health Nursing

- March 2-3^h, three Public Health Nurses attended the 2023 Wisconsin Lactation Consultants Conference in Oshkosh. The theme of this year's conference was to, "Discover New Insights to Empower Families Throughout Their Lactation Journey".
- March 14, all of the Public Health Nurses and Deputy Director completed all requirements to maintain CPR Certification. This American Heart Association course was provided by trained instructors of the Appleton Fire Department.
- March 20, Public Health Nurses worked with community partners to provide a sensory friendly routine vaccination clinic at the Building for Kids Children's Museum. This clinic was the first of two, and Appleton Health Department staff collaborated with The Autism Society of Greater Wisconsin, Wisconsin Early Autism Project, Building for Kids, and Mosaic Family Health.

Environmental Health

- Environmental Protection
 - Swimming Pool Samples: 56; 54 2022 YTD
 - Complaints: 9; 3 2022 YTD
- Rabies Specimens: 0; 1 2022 YTD

Environmental Health

- Environmentalist Britt Schuldes was hired and onboarded in March 2023. Based on the detailed time-study conducted in 2022, expansion of the division to 4.0 FTE, including the division supervisor, will fully staff the Environmental Health division.
- Environmentalist Austin Cumber conducted an internship for his Masters of Environmental Sustainability and Natural Resource Management at Texas Tech University. Through his internship, Austin, the Appleton Health Department, and Wisconsin Division of Health Services implemented a program to test licensed Early Childcare Center water fixtures for lead contamination. In total, 13 centers were voluntarily tested, all of which were in compliance. This program generated an additional \$15,600 in revenue at a minimal cost.

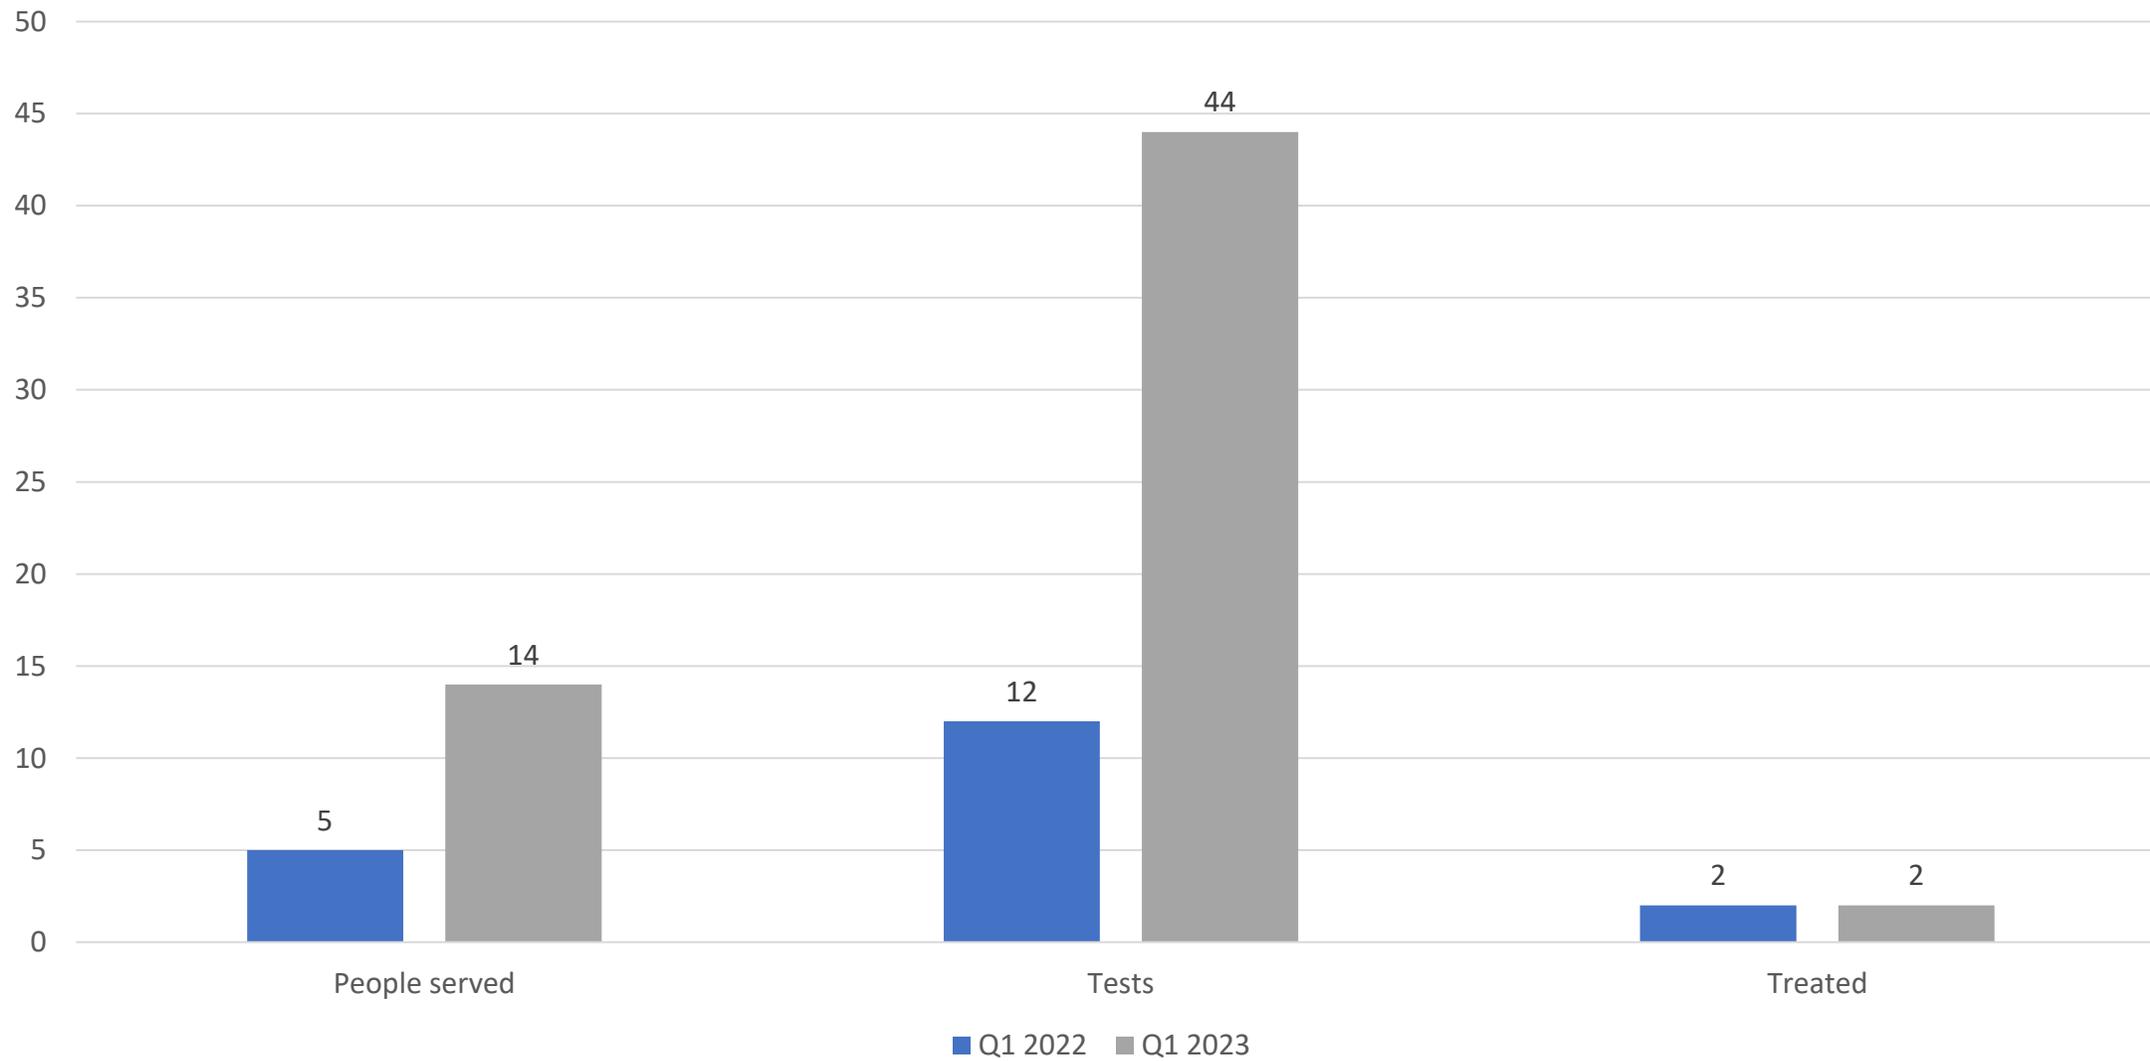

Chronic Disease and Injury Prevention

- Lead Elevations: 10; 5 2022 YTD

Access & Linkage to Primary Care

- Community Partner STD Testing and Treatment:
