RE: Project # 1517-75-78, 1517-75-81  
USH10/STH441 47 Interchange (Appleton Rd.)  
Winnebago County

Kurt Eggebrecht,

On Monday April 7, 2015, 2015 Vinton Construction Company will begin construction on the above named project. As we all know this project has a lot of work to be done in a short time frame.

Vinton Construction Company would like to request a noise variance for the above project. The Special Provisions of the project state no work on Appleton road can be performed after 10pm. To reduce congestion and increase safety we would like to work two twelve hour shifts. This would allow Vinton to have 3 crews during the day and two at night. We feel this would cut down on construction traffic during the day and help the project be safer and flow more freely. Listed below are the operations we would like to perform at night from the start of the project on April 7<sup>th</sup>, 2015 until the projects scheduled end on July 3<sup>rd</sup>, 2015.

Storm Sewer work, Excavation, the source of noise from these operations would be excavators, dozers, tractor backhoes and Dump trucks. Vinton Construction Company would perform no Crushing or breaking operations at night. Please feel free to call me at the number listed below with questions.

Respectfully,

Robert Brownson  
Vinton Construction Company
