Paula,

I will plan on attending the meeting on the 26th. I also will opt for request #2 as stated below (amendment to current, approx.. 17x14).

Thanks,

Mike

Mike,

Next week's Municipal Services Committee has been cancelled so this item will be on the August 26th Committee agenda.

Mike,

Your options (as I see them) are...

1. Cut to 18 feet – with max 3 feet height for bushes - as recommended by the Municipal Services Committee – I believe the City Council will approve this recommendation from Committee.
2. Request that the Municipal Services Committee change their amendment from 18 x 18 foot vision corner to the amount that you have it (probably more like 17 feet by 14 feet).

Paula,

So what does this mean? I spent the better part of last Sunday afternoon trimming/pruning measuring to as close to 18 ft as I could without destroying the integrity of that corner (which is a safety and sound buffer, necessary due to the ridiculous curves/speeds and lack of enforcement of speeding on Midway Road). What's my next step?

Mike
