

Appleton Health Department

2023 Q3 Report

There are five Foundational Areas in Public Health, also known as Public Health Programs. The Appleton Health Department reports quarterly on quantitative metrics in each program. The data reported here is compared to the data for the same period the previous year.

LEARN MORE

Communicable Disease Control

While there has been a decrease in STDs compared to the previous year, increased STD rates among persons age 18 and under are attributed Chlamydia cases.

Chronic Disease Control & Injury Prevention

The new lower blood lead reference value of 3.5 µg/dL means that more children are identified as having lead exposure.

Lead Elevations
