

Halt the Unnecessary Construction of Sidewalks on Perkins St. in Appleton, WI

I am a homeowner on Perkins St., living in a house built back in 1950 that has never had a sidewalk. Our neighborhood hasn't seen any new schools or businesses that would necessitate the installation of sidewalks. Yet, the city is planning to construct sidewalks from Prospect Ave to the RR Tracks on our street.

This year, we are already bearing the financial burden of new sewer lines being installed by the city. Next year, they plan to redo our road and add sidewalks - an additional cost for us homeowners who are still grappling with yearly tax increases.

The proposed construction seems unnecessary and financially burdensome for residents like myself who have been part of this community for decades. According to data from Walk Score, Appleton's overall walkability rating is already above average at 63 out of 100 (source: Walk Score). Thus, there appears to be no pressing need for additional sidewalk infrastructure at this time.

We urge you to reconsider this construction project and prioritize other areas where improvements could make a more significant impact without imposing undue hardship on long-standing residents.

Please sign this petition if you stand with us against unnecessary construction and increased financial burdens imposed by such projects.
