Areas of Primary Concentration for 2017

Population health strategies will remain a priority for the department in 2017. Our department will continue to serve in a leadership role for the Weight of the Fox Valley project. Obesity is a known risk factor for cardiovascular disease, type 2 diabetes, certain cancers and a wide range of other diseases.

Re-emerging communicable disease such as measles, pertussis and TB will continue to impact our community and as such, we will continue to strengthen surveillance and communication with our health care partners.

Budget Performance Summary

See the attached FASTR report of program expenses. It is important to note that these are not final audited numbers.
