Hi Sue,

NEWSC participated in the Outagamie County Field Days again this year. We manned a water station in which 5th & 6th grade students & chaperones learned about stormwater runoff and management, agriculture runoff, groundwater and watersheds. In three days we reached 973 students and more than 75 teachers or chaperones.

Many Appleton schools were involved in the program:

Name of School	# of kids
St. Peter Lutheran	45
Houdini Elementary	100
Janet Berry Elementary	135
Mount Olive Lutheran	50
Johnston Elementary	60
Jefferson Elementary	90
Total	480

We have also been invited to participate in an environmental education program at Valley New School in Appleton. This is a semester long program that we will be mentoring a group of students who will be conducting a stormwater related water quality project and then presenting it at a community event in December. This is a project that our new Outreach Coordinator will be helping with – you'll meet her tomorrow! We'll keep you updated☺
