# PARKS, RECREATION & FACILITIES MANAGEMENT

#### Dean R. Gazza, Director

1819 East Witzke Boulevard Appleton, Wisconsin 54911-8401 (920) 832-5572 FAX (920) 993-3103 Email - dean.gazza@appleton.org

TO: Finance Committee

FROM: Dean R. Gazza

DATE: 11/22/2021

RE: Action: Award the City of Appleton's "2021 Wastewater Lighting Upgrades

Project" to Van Ert Electric Co., Inc. in the amount of \$83,450 with a contingency

of \$6,000 for a project total not to exceed \$89,450

The 2021 Capital Improvement Plan includes \$125,000 to install new lighting fixtures at the Wastewater Treatment Plant. Of that amount, \$23,200 has been utilized for professional services, leaving a balance of \$101,800 for construction. This project includes replacing existing light fixtures that are inefficient and are at the end of their useful life.

The bids were received as follows:

**Van Ert Electric Co., Inc.** \$83,450 Elmstar Electric Corporation \$128,438

Our consulting engineer has written the City of Appleton a formal letter of recommendation to award the contract to Van Ert Electric Co., Inc. The Parks, Recreation, and Facilities Management Department has also reviewed the bids and is in agreement with the engineer's recommendation. Therefore, we recommend awarding the contract to Van Ert Electric Co., Inc. in the amount of \$83,450 plus a contingency of \$6,000 only to be utilized as needed.

Please contact me at 832-5572 or at dean.gazza@appleton.org with any questions.

# PARKS, RECREATION & FACILITIES MANAGEMENT

#### Dean R. Gazza, Director

1819 East Witzke Boulevard Appleton, Wisconsin 54911-8401 (920) 832-5572 FAX (920) 993-3103 Email - dean.gazza@appleton.org

TO: Finance Committee

FROM: Dean R. Gazza

DATE: 11/22/2021

RE: Action: Award the City of Appleton's "Green Ramp Light Fixture Installation

Project" contract to Van Ert Electric Co., Inc. in the amount of \$84,500 with a

contingency of \$5,507 for a project total not to exceed \$90,007.

The 2021 Capital Improvement Plan includes \$185,000 to replace the lighting fixtures at the Green Parking Ramp. Of that amount, \$14,900 has been utilized for professional services and \$160,093 has been utilized for the direct purchase of the light fixtures, leaving a balance of \$10,007 for installation of the fixtures. This request includes installation of the replacement light fixtures for all lights in the Green Parking Ramp. The existing lighting is inefficient, at the end of its useful life, and needs replacement. Over the last year the cost of light fixtures and the materials for installation has gone up over 50% causing the project to come in over budget. The Parking Ramp fund currently has sufficient funds to cover the overages for the 2021 Green Ramp Light Fixture Installation Project. The existing light fixtures are failing and have to be replaced. The Parks, Recreation, and Facilities Management Department and the Parking Utility both recommend that we proceed with the contract to install the light fixtures based upon the current need.

The quotes were received as follows:

**Van Ert Electric Co., Inc. (low)** \$84,500 Elmstar Electric Corporation \$159,962

Our consulting engineer has written the City of Appleton a formal letter of recommendation to award the contract to Van Ert Electric Co., Inc. The Parks, Recreation, and Facilities Management Department has also reviewed the bids and is in agreement with the engineer's recommendation. Therefore, we recommend awarding the contract to Van Ert Electric Co., Inc. in the amount of \$84,500 plus a contingency of \$5,507 only to be utilized as needed.

Please contact me at 832-5572 or at dean.gazza@appleton.org with any questions.

Finance Department 100 N. Appleton Street Appleton, WI 54912 920-832-6442

**TO:** Chairperson William Siebers and Members of the Finance Committee

FROM: Kelli Rindt, Enterprise Fund Accounting Manager

Chris Shaw, Utilities Director

DATE: November 10, 2021

RE: Approve write-off of obsolete and no longer need parts from

inventory.

#### **BACKGROUND:**

The Utility Department completed a review of Wastewater inventory items. The review looked at inventory parts within the system that have had no transactions since the end of 2018. Items were reviewed for useable condition. Some items were in useable condition but are no longer needed for maintenance or the operations of the treatment plant.

The Utility Department also reviewed some select items within the Water inventory system that are no longer needed due to changes in lime chemical equipment.

Attached is a listing of items that no longer need to be maintained in the Water and Wastewater inventory systems.

#### **RECOMMENDATION:**

Approve inventory write-off \$14,317.12 for wastewater items and \$2,711.97 for water items that are no longer needed. Disposal of these items will follow the Procurement & Contract Management Policy and will include metal recycling, discarding to trash and internet or other selling tools for parts that are still useable condition with value. Should you have any questions regarding this project please contact me at phone: 920 832-6316.

RE: Information Item: Library Design Update

The Library design process is progressing according to schedule and has transitioned from schematic design to design development. Design development moves beyond general concepts and schematics and begins to incorporate details and specifications required for construction. This includes increased plan detail such as interior and exterior building finishes, specific dimensions, code review, and building system requirements. The design development phase prepares us for the construction document phase which is scheduled to occur in spring of 2022.

The input from user groups, stakeholders, staff and others has been invaluable and has shaped the design, which seeks to meet the current and future needs of our community. We are thankful for this feedback and will continue to provide further opportunities as the design progresses.

Upon completion of the schematic design, our architect and construction manager provided initial estimates of cost including numerous options for consideration. At this relatively early stage of design development, cost estimates serve as an important checkpoint to understand whether all project elements can be included, or if some need to be rethought. There is a wide variety of choices that can be made in regards to the degree of technology, sustainability, aesthetics, quality of finishes and other factors that affect cost. In construction projects, the process of identifying cost savings across these various components of the project is often referred to as "value engineering."

From the outset of this process, the City's commitment of tax-funded borrowing for the project has been capped at \$26.4 million. The 2022 Executive Budget and Service Plan held firmly to that commitment, and the Mayor has committed to do the same for the 2023 budget. In addition, the City Council has supported allocating \$2 million of our municipal ARPA allocation for broadband network infrasturcture to the library project as well. If the total cost of the project exceeds this allocation, the balance will need to come from other sources such as fundraising and/or grants.

Overall, the intitial estimate, prior to signficant value engineering as discussed above, is aproximately \$39 million for the total project. This figure includes pandemic-induced cost escalation of roughly 27% since the initial cost estimate of this project, an issue affecting labor and materials costs across the country. **Despite these increases, as previously stated, the City of Appleton's borrowing commitment to the project remains unchanged at \$26.4 million,** thus the work ahead on the project funding will be focused on securing additional resources from a variety of sources. Although the pandemic created challenges due to these extreme cost escalations, there are also Federal and State funding opportunities that have never existed before. Our project is well-positioned to take advantage of these opportunities and staff is working diligently to pursue these alternate sources. We are optimistic that we will be able to put together a successful and diverse funding package.

It is important to note that this cost estimate is preliminary, and at this phase, generally considered a target until further design is developed. Also, these estimates include features and systems that stakeholders have expressed should be a community priority. For example, this estimate includes initiatives related to sustainability and health such as geo-thermal, a green roof, photovoltaics, advanced technology, high-end finishes, furniture and equipment, and landscaping of the roof terrace and site. Many of these items can be modified or eliminated without changing the core vision and goals of the project which is providing quality library services, but are desired to maximize the potential use of the facility. Some of these initiatives would also provide long-term operating cost savings. Upon completion of design development, we will again update the project estimate. In addition, we hope to have updates on the status of fundraising efforts and grant awards.

In conclusion, the project continues to progress well. Our team is working hard to deliver a project that will meet stakeholder expectations in a financially reponsible manner. Thank you for your support, and thank you to the community as a whole, for providing input at a level not previously experienced, to bring Appleton a Library for everyone.
