1/13/16 Board of Health presented

7. Adjournment

*Notice is hereby given that a quorum of the Common Council may be present during this meeting, although no Council action will be taken.*

*Reasonable Accommodations for Persons with Disabilities will be made upon Request and if Feasible.*

TO: Kurt Eggebrecht, Health Officer City of Appleton

FROM: Patti Coenen, Owner, Fox River House

RE: Noise Variance

March 11, 2016

Dear Kurt,

I am requesting the following weekend dates for a noise variance for the Fox River House beer garden. Times are from 7pm-11pm unless otherwise noted.

May 21, 27, 28

June 3, 4, 10, 11, 17, 18, 24, 25, June 26 for wedding reception of one of my bartenders until 9pm

July 1, 2, 8, 9, 15, 16, 22, 23, 29, 30, July 24<sup>th</sup> warm up event for Mile of Music until 9pm

August 3, 4, 7 (Mile of Music 11am-11pm) 5-6 (Mile of Music 11am-12 Midnight), 12, 13, 19, 20, 26, 27

Sep 2, 3, 23, 24 (Ocotberfest 2pm-11pm)

Our ability to have live music is truly what has made my business successful. And over the years it has allowed me to continue to make improvements to the property such as exterior paint and façade renovations, new cement on patio, inside flooring renovations, new ice machine, new furnace and so on. Thank you again for your consideration in this matter.

Regards,

Patti

Pricing errors found	39	55	59

**Resolution #5-R-16**

Alderperson Plank

4-06-2016

WHEREAS, the City of Appleton has previously enacted Appleton city ordinance 3-15 which commands owner(s) or caretaker(s) of any animal to confine, restrain or maintain control over the animal so that the unprovoked animal does not run at large, attack or injure any person or domesticated animal,

WHEREAS, the City of Appleton has not required animal owners and/or caretakers to place their animals on a leash, so long as the owner and/or caretaker is able to maintain control over the animal. However, as a result, unleashed animals have proven to be disobedient when permitted to run unleashed and, on occasion have caused unprovoked attacks to humans and other animals.

THEREFORE BE IT RESOLVED that the City conduct a review of the current Animal Ordinance to modify and clarify language and definitions which result in more specific and safe leashing and restraint measures.

### Zika Virus Outbreak & Interim Guidelines for Pregnant Women

The Zika virus is a mosquito-borne flavivirus that is transmitted primarily by the *Aedes* species, such as *Aedes aegypti* and *Aedes albopictus*. Not all *Aedes* species transmit the virus, and it is unknown if there are other mosquito species that could transmit the virus. *A. aegypti* prefers to bite humans, whereas *A. albopictus* prefers to obtain it's meal from

*Aedes aegypti* mosquito

animals; both types are aggressive daytime biters. The *Aedes* species is present in southern United States, and local transmission of the Zika virus could occur there. Currently, neither *A. albopictus* nor *A. aegypti* are found in Wisconsin or Minnesota.

Although the virus has only made the news the past few months, the virus is not new. Zika was first detected in humans in 1952. There have been previous Zika outbreaks in Africa, Southeast Asia,

and Pacific Islands. A Zika outbreak in the continental United States is only possible if all of the following occur:

- People infected with the virus enter the United States.
- An *Aedes* mosquito in the United States bites the infected person during the relatively short time that the virus can be found in the person's blood.

(Continued on Page 2)

### Free Volunteer Training

Volunteers fulfill the needs of communities on a daily basis. During a Public Health emergency, Thrivent Public Health volunteers assist the Appleton Health Department in mass clinic operations; the Health Department encourages all volunteers to be prepared for an emergency event by completing FREE training through the Federal Emergency Management Agency (FEMA). These courses will help volunteers better understand how they can participate in the mass clinic structure during an emergency. The courses are online and, again, they are free.

The courses can be found at the following addresses:

- **ICS 100:** <http://training.fema.gov/is/courseoverview.aspx?code=IS-100.b>
- **ICS 700:** <http://training.fema.gov/is/courseoverview.aspx?code=IS-700.a>
- **ICS 200:** <http://training.fema.gov/is/courseoverview.aspx?code=IS-200.b>

Courses should be taken in the order listed to keep the flow of information consistent.

<b>Zika Virus</b>	<b>1</b>
<b>Volunteer Training</b>	<b>1</b>
<b>Zika Continued</b>	<b>2</b>

## Zika, continued

- The infected mosquito lives long enough for the virus to multiply and for the mosquito to bite another person.

Symptoms of Zika virus include fever, rash, joint pain, and red eyes. The symptoms are usually mild and typically last several days to a week. About 80% of people infected with Zika virus do not experience any symptoms, which means screening travelers coming from places with local Zika transmission to prevent imported cases in the United States will not be effective. Currently there is no vaccine available.

Centers for Disease Control & Prevention (CDC) have confirmed that Zika virus can be sexually transmitted by men. While CDC does not yet know how long the virus can remain in semen, it is known that the virus does so longer than in blood. In one case, Zika virus was found in semen 62 days after symptoms began.

In an effort to prevent sexual transmission of Zika to pregnant women, men who have been infected with the virus or have traveled to areas with Zika

transmission should abstain from sex (vaginal, oral, and anal) with pregnant partners or use condoms properly throughout the duration of their partner's pregnancy. As of April 5, CDC recommends that if diagnosed with Zika virus, men wait six months and women wait eight weeks before attempting to conceive.

There have been reports of serious birth defects of the brain, called microcephaly, in babies whose mothers were infected with the Zika virus while pregnant. So far, all reports of microcephaly have been congenital microcephaly, but babies can contract the virus during birth if the mother was infected in the two weeks prior to delivery. It is unknown if babies who become infected during birth will develop microcephaly as a result of contracting Zika virus.

Babies born with microcephaly have heads smaller than expected and brains that may not develop properly as a result. CDC is currently recommending that all women who are pregnant, regardless of trimester, consider postponing travel to any area with ongoing Zika virus transmission. If pregnant women must travel to those areas, they should follow strict steps to prevent mosquito bites on their trip.

Prevention tips include wearing long sleeved shirts and pants, using proper mosquito screening, and using Environmental Protection Agency (EPA) registered insect repellents. EPA registered repellents are safe for pregnant and breastfeeding mothers. For more information regarding travel and Zika virus visit <http://wwwnc.cdc.gov/travel/page/zika-information>.

### Preparedness Resources

The best way to help your community during a disaster is to be prepared yourself. Learn how to prepare your family for emergencies.

[www.ready.gov](http://www.ready.gov), a Federal Emergency Management Agency (FEMA) run website can help your family be more prepared.

These maps show the potential range of the *Aedes aegypti* (left) and *Aedes albopictus* (right) mosquitoes in the United States and U.S. territories as of April 5, 2016.

**The following noise variance requests have been approved by  
Health Officer, Kurt Eggebrecht:**

*ADI Holiday Fun Fest  
Houdini Plaza  
December 17<sup>th</sup>, 10am-3pm*

*St. Mary Parish Picnic  
Pierce Park  
July, 9<sup>th</sup> 4:15pm*

*LU-Aroo Concert  
Lawrence University  
May 28<sup>th</sup> & 29<sup>th</sup> 12pm-11pm*

*Annual Lip Sync Event  
Wriston Amphitheater  
May 9<sup>th</sup>, 7:30pm-9:30pm*

*Sole Burner  
American Cancer Society  
May 7<sup>th</sup>, 7:30am-11am*

*Concert for Consent  
Lawrence University  
April 23<sup>rd</sup>, 2pm-4pm*
