IN THE CITY OF APPLETON,
OUTAGAMIE COUNTY,
STATE OF WISCONSIN

CITY OF APPLETON
A Wisconsin Municipal Corporation

Petitioner,

v.

Jeffrey J Verner & Christine Morrissey
As owner of *Snap: Female, Black and White, Outagamie 2019 #2420, vaccinated 2019*
crossroads veterinary clinic

Respondent.

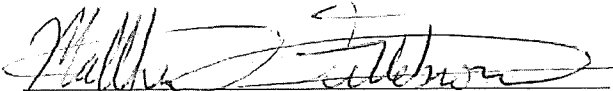

ORDER DECLARING ANIMAL DANGEROUS

As the owner and/or caretaker of *the above-named animal*, you are hereby notified that the City of Appleton has declared that *the above-named animal* is dangerous pursuant to the City of Appleton's Municipal Code 3-131.

Because the animal has been declared dangerous, you are further notified that you must immediately comply with leashing, muzzling, and confinement requirements of City of Appleton Municipal Code Section 3-132. You must, within thirty (30) days, comply with all other requirements of City of Appleton Municipal Code Section 3-132 of the dangerous declaration.

This order remains in effect, even if appealed, until modified or withdrawn. This order is in effect for the lifetime of the animal.

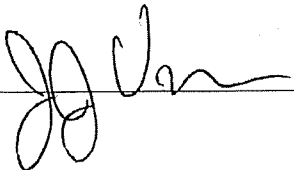

SO ORDERED, this 6 day of June, 2019 at 8:00 am/pm.

Matthew Fillebrown, Certified Humane Officer
Appleton Police Dept. City of Appleton, WI

I, JEFF VERNER (respondent's printed name), acknowledge receipt of this order and understand the contents of the order, including the time limits if I wish to appeal.

Signed: _____

Date: 6-6-2019

the municipal code is attached to this document. This order is intended to protect against injurious results to human beings and domestic pets caused by unprovoked attacks by your animal.

APPEAL RIGHTS ARE TIME-SENSITIVE:

If you or any other owner or caretaker of the above-named animal wishes to contest the attached Order, **within 72 hours YOU MUST deliver to the Health Officer a written objection** to the order stating specific reasons for contesting the order. Failure to timely file an objection will result in your forfeiture of the right to appeal this Order.

The health officer, Kurt Eggebrecht, M.Ed. with the City of Appleton Health Department can be reached at:

Kurt Eggebrecht, M.Ed.
100 North Appleton Street
Appleton, WI 54911

Phone: 920-832-6429

Fax: 920-832-5853

Email: kurt.eggebrecht@appleton.org

I have enclosed copies of the City of Appleton Municipal Ordinances pertaining to this matter. Please review and comply with City of Appleton Municipal Code Section sections 3-1, 3-2, 3-131, 3-132, 3-133, and 3-134.

If you have any further question, please contact the City of Appleton Health Department.

Sincerely,

Matt Fillebrown

Lead CSO #9563 / Humane Officer
Appleton Police Department

Enclosures:

Order

City of Appleton Municipal Code Sections 3-1, 3-2, 3-131, 3-132, 3-133, 3-134

06/06/2019

Jeffrey J Verner & Christine Morrissey

RE: DECLARATION AND ORDER OF DANGEROUS ANIMAL

Dear *Jeffrey J Verner*, Christine Morrissey

Please let this letter and the attached order serve as your notice that the City of Appleton's Humane Officer has formally declared your animal, *Snap: Female, Black and White, Outagamie 2019 #2420, vaccinated 2019 crossroads veterinary clinic*, as a **dangerous animal**, pursuant to the City of Appleton Municipal Code, Section 3-131.

I have declared your animal as dangerous after conducting my investigation, which is summarized below:

- *On 05/24/2018 Appleton Police Department personnel were dispatched to the location of 1102 N Union Street concerning a report of a dog attack. Upon the officer's arrival, it was reported that your dog "Snap" (identified above), left its property aggressively charged at other people walking their dog. The investigation showed that Snap's actions were deemed to be classified in violation of city ordinance ac 3-15(b), Molestation. (Ref. #A18018497).*
- *On 05/26/2019 your dog, Snap, was involved in another dog attack. The investigation showed that Snap jumped over his fence and left the property of 1102 N Union street and attacked another dog. It was reported that Snap attacked the animal's neck and pinned the dog down. Snap then attacked its owner when multiple people were trying to break up the animal attack. The wounds suffered by owner Jeffrey needed to have medical attention at the Appleton Medical Center. This attack was documented as an Animal at Large, Unprovoked attack. (Ref. #A19017292).*

Due to repeated instances of Snap being involved with Unprovoked Animal Attacks and Animal Molestations while being off property and having an aggressive disposition to attack other animals and humans, it has been determined that the dog "Snap" is a dangerous animal.

IMMEDIATE ACTION IS REQUIRED:

Because your animal has been declared dangerous, you must comply with leashing, muzzling, and confinement requirements **IMMEDIATELY**, as set forth in City of Appleton Municipal Code Section 3-132. You must, **within thirty (30) days**, comply with all other requirements of City of Appleton Municipal Code Section 3-132 of the dangerous declaration. The pertinent section of

Dear Mr. Eggebrecht,

6/6/2019

I am writing to contest the Declaration and Order of Dangerous Animal conferred upon our dog Snap by order of the City of Appleton's Humane Officer.

Snap is a rescue dog that we have had for 5 years. She was adopted on 4/25/2014 from New Pawsabilities Animal Rescue in Oshkosh, WI. We do not know under what conditions she survived prior to her rescue, though we were told she came from Kentucky, that she was severely malnourished upon rescue and that she had several puppies, 3 of whom were rescued with her. For all we know she may have been used as a bait dog. She was still quite filthy and was bathed immediately upon bringing her home. The bath revealed many scars on her legs, ears and face.

She has resided here at this address since her adoption date without incident, until May 24, 2018. That incident was initially determined to be Animal at Large by the investigating officer. A supervisor later added the Molestation violation. No persons or other animals were injured. She was enticed by the smell of a brat fry down the street and took off running when Jeffrey let her out of the yard to go back to the house.

Regarding the incident that occurred 5/26/2019, it was inaccurately reported that Snap jumped the gate. The gate was mistakenly left open by a neighbor who entered the yard to chat with Jeffrey.

The other dog involved in the attack on our property has demonstrated aggressive behavior toward other dogs it encounters on its walks. We have witnessed this on several occasions as the owners have walked it past our property. Lunging, growling, barking and snapping. If not for the harness they would have no control of that animal at all. Snap did rush at it from what I understand, but not entirely unprovoked. That dog did not sustain any wounds, nor did its owner. People who tried to help break up the fight when it had Snap by the ear and would not let go, were bitten by that dog. Snap sustained wounds to her ear that required stitches at the Animal Referral Center. Jeffrey was not bitten

by Snap out of malice, she was defending herself from the dog that had her ear in its grip.

Both incidents with Snap occurred under the supervision of Jeffrey. I had explained to him many times that when Snap is outside she must be on a leash or secured inside the fence. Jeffrey was at fault, not Snap. He was mistakenly under the false and arrogant impression that he had complete voice control of her with no formal training in dog obedience. He is completely aware that he has put his dog at risk of being euthanized and is very remorseful for his ignorance regarding dog behavior.

We both fully intend to comply with the leash requirements, as well as keeping her secured in the house and the yard. We have had a lock on the gate for years on the off chance that a neighbor child would open it and let her out accidentally. For her own safety, we will muzzle her on walks.

If still deemed necessary, we would register her each year and pay the \$75 fee.

We do respectfully request the requirement for liability insurance in the amount of a million dollars be waived. Having spoken to several liability insurers, they were of the opinion that amount is excessive. These are usually within the \$100,000 - \$500,000 range with \$300,000 being common. The quote we received for \$500,000 of insurance was \$3000 per year, and that is an expense we simply can not afford.

Snap is not a threat to any human. She is a very sweet girl who loves attention and affection. She has been around many children, including my grandchildren, and people of all ages with no threat of harm. We would like an opportunity to prove that she poses no threat to any person. We would love to bring her in for a visit. Our veterinarian would also be able to attest that Snap is a very good girl who absolutely adores people. It would be a shame to have to destroy this wonderful dog.

Sincerely,

A handwritten signature in cursive script, reading "Christine Morrissey". The signature is written in dark ink and is positioned above the printed name.

Christine Morrissey

APPLETON HEALTH DEPARTMENT QUARTERLY REPORT April, 2019- June, 2019

Executive Summary

The Health Department's day-to-day activities for the first quarter of 2019 are enumerated in the attached report. The Department continues to work toward fulfilling the goals of our Department, keeping in mind the belief statements that support and enhance our mission statement.

“Plays a vital role assessing and assuring the health needs and trade practices in the community”

May 9, City Sealer Eric Maggio and Weights & Measures staff spoke at the annual Festival Foods Farm Market meeting at the Festival Foods Store on Northland Ave. A record number of vendors attended the meeting this year. Weights and Measures Specialists provided information regarding policies as well as the testing of 17 farm market vendors' scales. The mandatory meeting provides a great foundation for compliance throughout the Farm Markets summer duration. Weights and Measures staff will monitor the farm market closely throughout the summer to ensure compliance is maintained.

May 29, City Sealer Eric Maggio and Weights & Measures staff spoke at the annual Appleton Downtown Saturday Farm Market Vendor meeting held in the Library meeting room. Maggio provided information regarding policies as well as going over rules. Weights and Measures staff tested 26 farm market vendor's scales as well as package and labeling inspections. The meeting which is mandatory provides a great foundation for compliance throughout the summer duration.

This quarter, public health nursing staff worked with World Relief Fox Valley and various partners in the Appleton community to welcome 13 new refugees to Appleton. This service includes a review of medical records and facilitates finding a medical home for these new residents.

“Provides services to protect and promote the health and well-being of the citizen and consumer”

May 1, Health Officer Eggebrecht requested staff from Wisconsin Department of Health Services and the University of Wisconsin to conduct environmental sampling of a residence in Appleton for methamphetamine contamination following clean-up efforts by the homeowner. May 2, the testing took place and determined that the clean-up efforts were successful, and the occupant and children were allowed to move back into the home.

June 4, Michelle Roberts, RS conducted a courtesy inspection at the Boys and Girls Club food service kitchen at the request of the Food Manager. No items were noted in need of correction. While the Boys and Girls Club is exempt from licensing, it is still important to assure safe meal delivery.

Although at the time of writing, no cases of measles have yet to be reported in Wisconsin, more than 1100 individual cases of measles have been confirmed in 30 states in 2019. This is the greatest number of cases reported in the US since 1992 and since measles was declared eliminated in 2000. With a safe, effective vaccine available, this outbreak is the result of parents choosing to not vaccinate their children. By choosing not to vaccinate their children, they are also putting children too young to be vaccinated at risk of serious illness and long-term complications. This quarter we have increased our education efforts with Appleton public, private and university institutions to prepare for school exclusions of unvaccinated students and faculty, should we experience a lab-confirmed case. Health Officer Eggebrecht has also communicated these concerns on several radio programs this quarter.

“Communicates with the public on health and consumer related issues”

April 18, Health Officer Eggebrecht presented at the Appycademy where he discussed the history of public health and the services provided by the department. Participants were also provided a pandemic flu home planning kit.

May 3, public health nurses Becky Lindberg, Jess Moyle and Krista Waterstradt presented at the 31st Annual Young Parent Conference. Topics included safe sleep, pregnancy and breastfeeding. 42 young parents attended the conference, which was held at Fox Valley Technical College.

May 28, public health nurses Sonja Jensen and Krista Waterstradt presented on Communicable Diseases in Child Care to staff at YMCA Apple Creek Childcare. 13 staff were in attendance.

May 29, Michelle Roberts and Steve Kihl conducted annual training to participants of the ADI farmer's markets. These trainings lead to higher compliance and understanding of food safety issues.

June 3, public health nurses Becky Lindberg and Jess Moyle trained 21 staff at the Appleton Downtown YMCA on Breastfeeding Friendly Childcares.

June 4, Jess Moyle, RN presented at the Northeast Region Prenatal Care Coordination (PNCC) meeting in Menasha about Breastfeeding. 20 PNCC providers were in attendance.

June 10, public health nurses Val Davis and Krista Waterstradt presented on Communicable Diseases in Child Care to staff at the Young Child Development Center. 18 staff were in attendance.

June 13, Steve Kihl, along with staff from Police and Fire, conducted the annual training for new participants planning to have food booths at this year's Octoberfest.

June 13, public health nurses Jena McNeil and Krista Waterstradt presented on Communicable Diseases in Child Care to staff at the Apple Tree Connections where 20 staff were in attendance.

“Provides services in a cost effective and efficient manner”

April 4, Public health nurses Becky Lindberg and Jess Moyle designated the Appleton YMCA Child Learning Center as Breastfeeding Friendly. This designation is based on criteria established for the workplace setting.

“Develops and evaluates departmental programs, policies and procedures based on community needs and collaborate with community agencies and providers to assess those needs and ensure high quality services”

April 18, Health Officer Eggebrecht moderated the morning keynote presentations at the Wisconsin Health Education Network conference held in Middleton, Wisconsin. This year's theme was Emotional Intelligence at the Workplace.

Public health nurses Jess Moyle and Becky Lindberg are active in a regional coalition called The Breastfeeding Alliance of Northeast Wisconsin (BFAN). In April, they hosted two Community Conversations. Participants were asked to reflect on their early breastfeeding experiences, and their successes and challenges. The Community Conversation on April 30 was held at the Appleton Library, and included 11 Moms and 9 children.

April 24, Health Officer Eggebrecht hosted the UW Population Health Institute's Advisory Board meeting here in Appleton. This is the first time the Board has convened outside of Madison. Eggebrecht has served on the Board for several years, which provides insight to the important work of the Institute, including the county health rankings, health equity and state policy development.

May 6, public health nurses Becky Lindberg and Jess Moyle met with staff from the Downtown YMCA and the Fox Cities Chamber and provided education on how worksite locations can become Breastfeeding Friendly.

June 28, Health Officer Eggebrecht was requested to meet with public and non-profit organization leaders in Chippewa Falls who are interested in Health in All Policy legislation to advance the health of all in their community. There is a growing recognition that community health improvement efforts need to focus on engaging those that often don't have a voice to improve the health of all.

Health Officer Eggebrecht continues to serve on the State of Wisconsin Health Improvement Plan advisory committee. This quarter they met May 20 and June 25 to discuss how health inequities impact the health of all residents.

“Professional staff works together as a cohesive team by cooperating, communicating and supporting each other to achieve departmental and individual goals”

Our department places a high priority on staff training. This quarter, staff participated in a variety of trainings, including:

April 4, public health nurse Krista Waterstradt attended the Madison-Dane TB Summit in Verona, WI.

April 16-17, public health nurses Jess Moyle and Krista Waterstradt attended the Maternal Child Health Summit in Eau Claire. The theme at the conference was, “Investing in Health Equity with Family and Community Partnerships”.

May 2, Steve Kihl attended Pest Control Operator recertification training offered by Wisconsin Department of Agriculture, Trade and Consumer Protection (DATCP) and the UW-Extension. This recertification is required every 5 years to allow the use of restricted-use pesticides used for rodent control.

May 9, Steve Kihl attended training regarding the Recreation/Education Camp administrative code. This training was offered by WI DATCP, Food and Recreational Licensing section.

May 17, public health nurses Sue Larson and Becky Lindberg, along with public health nursing supervisor Sonja Jensen, attended the joint refugee resettlement team meeting in Oshkosh. This meeting included testimonies from Oshkosh North High School students with refugee backgrounds, and held a round table discussion regarding, "Career aspirations expressed by our refugee population".

May 22-23, several staff received state scholarship funds to attend the Wisconsin Public Health Association annual conference. This year's event was held in Wisconsin Dells. Public health nurses Jena McNiel, Val Davis, Krista Waterstradt; Weights and Measures City Sealer Eric Maggio and Health Officer Eggebrecht all benefited from this two-day training.

June 19, public health nurse Val Davis attended HIV Partner Services training in Madison.

This quarter, due to retirements, the Health Department hired two new Public Health Nurses. Valerie Davis started on April 23 and Julie Erickson started on June 25.

Respectfully submitted,

Kurt Eggebrecht, M.Ed., MCHES
Health Officer

New Cases Identified in Investigation of Lung Disease Among Teens and Young Adults Who Reported Vaping

DHS urges Wisconsinites to avoid vaping and e-cigarettes

The Wisconsin Department of Health Services (DHS) has received 11 cases of teenagers and young adults hospitalized with severe lung disease that has been linked to recent vaping. Seven other cases are under further investigation. Counties with confirmed cases include Door, Racine, Walworth, Dodge, Waukesha, and Winnebago.

"We are currently interviewing patients, all of whom reported recent vaping. Our disease investigators continue to gather information about the names and types of vape products that were used in hopes of determining a common link," said Department of Health Services Secretary-designee Andrea Palm. "We strongly urge people to avoid vaping products and e-cigarettes. Anyone—especially young people who have recently vaped—experiencing unexplained breathing problems should see a doctor."

DHS Secretary-designee Andrea Palm and Chuck Warzecha, Deputy Administrator of the DHS Division of Public Health, will be hosting a Facebook chat at 2:00 p.m. this afternoon. Experts will be available to answer your questions about the illness and vaping from 2:00 p.m. to 3:00 p.m. today on [Facebook](#).

These patients experienced shortness of breath, fatigue, chest pain, cough, and weight loss. The severity of the disease has varied among patients, with some needing assistance to breathe. While patients have improved with treatment, it is not known if there will be long-term health effects. People should contact their doctor or local or tribal public health offices with any concerns about these symptoms.

This is an ongoing investigation and DHS is working with the Centers for Disease Control and Prevention (CDC), local health care providers and is coordinating with other states to make them aware of the situation so they are prepared if they have reports of similar cases.

People can learn more about e-cigarettes and vaping products—including what they look like and how to talk to kids about them—at tobaccoischanging.com.

Resolution #9-R-19
E-Cigarette/Nicotine Device Use in Young Adults

Date: July 24, 2019

Submitted by: Cathy Spears, Alderperson District 12

Referred to: Safety & Licensing Committee

Whereas, the CDC and Surgeon General have released advisories alerting the public to the negative health effects of the use of e-cigarettes and especially the negative impact of nicotine on the adolescence population.

Whereas, the brain continues to develop until the age of 25

Whereas, the use of nicotine negatively impacts teens and young adults by actually changing adolescents' brain cell activity in the parts of the brain responsible for attention, learning, and memory

Whereas, it is difficult to distinguish the difference between e-cigarettes that contain nicotine and those that do not.

Therefore be it resolved;

That the Appleton Health Department and Appleton Police Department work together with the Attorney's office to craft the language prohibiting the use and possession of any e-cigarette and or nicotine containing device by anyone under the age that the State Statute age allows for possession and use of nicotine.

The final language is to include recommendations for enforcement and fines.

Resolution #10-R-19
Changing Beekeeping Permit Process

Submitted By: Alderperson Meltzer District 2 & Alderperson Schultz District 9

Date: August 7, 2019

Referred to: Board of Health

WHEREAS the health of bees and the health of our community is interdependent, and beekeeping is a necessary part of restoring collapsing bee populations that we rely on; and

WHEREAS Appleton has recently attained Bee City USA status; and

WHEREAS Appleton residents have provided feedback over the years since residential beekeeping was approved indicating that our regulations are extreme compared to surrounding communities, there are obstacles to accessing beekeeping in Appleton, and there are no incentives to remain in Appleton rather than move to our surrounding communities if one wants to keep bees at their residence;

THEREFORE be it resolved, that the City of Appleton make the following changes to our beekeeping permit requirements:

1. Change the permit cycle to November - November to align with timeline of purchasing bees and setting up hives
2. Remove notification and neighbor veto
3. Bring permit fees into alignment with other Wisconsin communities
4. Replace the calculation for hives per acre with a set number of hives per lot
5. Remove excessive detail from flyaway barrier requirements
6. Allow keeping Top Bar hives in addition to Removable Frame hives and recommend hives face SE direction if possible

**The following noise variance requests have been approved by
Health Officer, Kurt Eggebrecht:**
