From:
Kimberly Bradley
NE Region
Wisconsin Department of Transportation
Kimberley.bradley@dot.wi.gov

Dear Michael Hardy,

The Wisconsin Department of Transportation (WisDOT) Signals and ITS Standalone Program (SISP) has awarded the City of Appleton the following project (s) for FY28:

| Project Name | Award Total |
|---|---|
| City of Appleton Signal Rehab/Retrofit - Hwy 125 and Hwy 47 at Badger Ave | Total: $1,157,000<br>90% State: $1,041,300<br>10% Local: $115,700 |

The project will be funded 90% State/10% local municipality. Per current program policy any amount over the project application award shall be funded by the local municipality. WisDOT Region Staff will contact you prior to the award year to establish a State Municipal Financial Agreement (SMFA) between WisDOT and the City of Appleton to determine financial, invoicing, reporting, and contracting responsibilities for both parties. It is required that this project be encumbered during the fiscal year(s) noted in the application. It is the responsibility of the local project manager to notify the WisDOT program manager as soon as possible if timely encumbrance is not possible. Project encumbrances need to occur by June of the fiscal year (fiscal year ends June 30).

Please contact me if you have questions.

Sincerely,
Kimberley Bradley
