

COMMUNITY DEVELOPMENT DEPARTMENT 2015 Mid-Year Report

All figures through June 30, 2015

Significant 2015 Events:

1. RiverHeath, the 15 acre mixed-use development located off Banta Court and RiverHeath Way, near the College Avenue Bridge, celebrated the grand opening of its first mixed use building on June 25, 2014. The 32-unit apartment building was fully leased in 10 months or by April of 2015. The 6,700 sq. ft. of commercial space is valued at approximately \$7 million and was fully leased with the opening of Mr. Brew Pub. Another phase scheduled to break ground this year, includes a 38-unit apartment building and a commercial building. The site was once a paper mill along with other industrial uses. Its reclamation and clean-up is a great success story for the City. Developer Mark Geall with Tanesay Development says in addition to the contamination hurdles, the project survived the tough recession in 2008 as the development team and the City worked together to see the site revitalized.
2. The pending opening of The Draw at Eagle Flats (a 5,200 sq. ft. artist space) is a place for artists to work and socialize. It includes a gallery, private art studios, community workshops and art library. This project re-develops the former paper company's office building which sits adjacent to the river.
3. Community and Economic Development, collaboratively with area technology businesses, successfully hosted our first Appleton Civic Hackathon. This day-long event promotes community engagement, our strong tech sector, and works to attract young talent to the area.
4. We continue strategically investing in and working collaboratively on several significant regional economic development projects with the Fox Cities Regional Partnership, such as the site selectors familiarization tour, YP week, Talent Upload, the Artery and business retention programs.
5. The City's Economic Development Strategic Plan (EDSP) was completed in 2015 and identified primary goals and key strategies that will contribute to the City's future economic health, enhance the business climate, ensure the vibrancy and viability of the City and support community growth consistent with the City's character and culture. Staff is in the process of prioritizing the implementation of identified goals and strategies.
6. The City of Appleton designed and placed an inside cover ad in the Wisconsin Economic Development Guide distributed via Site Selection Magazine to 35,000 subscribers and enjoying 60,000 monthly web hits.
7. Work continued on next steps for the proposed Fox Cities Exhibition Center (FCEC). There are many components to this complicated project, and City staff is working diligently with

several stakeholders, municipalities and entities to move it to fruition. With the addition of the Exhibition Center, the Fox Cities will have a full service convention center that will attract and retain conventions and tradeshow that won't come now because of the lack of exhibit space. This will position the Fox Cities to once again be a top tier Midwest market site for regional conventions. Accomplishments this year include:

- a. Contracted with Hinshaw & Culbertson to assist with this project, including but not limited to, financial reviews, financial modeling, crafting the management agreement and the inter-municipal governmental agreements concerning the hotel room tax.
 - b. February 23, 2015, the Community and Economic Development Committee hosted a Council and Community Forum to discuss this project including a detailed Q & A.
 - c. March 4, 2015, the Appleton Common Council approved the purchase of the proposed site for the Exhibition Center.
 - d. The Fox Cities Convention & Visitors Bureau (CVB) awarded and disbursed to the City, on behalf of the FCEC, a \$250,000 grant to support the design of the center.
 - e. The Fox Cities Exhibition Center Board dissolved, but members will remain community ambassadors for this project.
 - f. June 3, 2015, the Radisson Paper Valley Hotel changed hands, with Inner Circle Investment purchasing the hotel. The City and the new owners have met several times to negotiate the Management Agreement and discuss other topics to move this project forward.
8. The City has sold four parcels in the Northeast Business Park in the first half of 2015. Details of those sales include:

Location	Sale Price	Acres (# of lots)	Price/Acre	Sale Date	Purchaser
SWC Zuehlke Dr./ Goodland Dr.	\$115,200	2.88 (2 lots)	\$40,000	4-30-15	Farrell Investments LLC
NWC Zuehlke Dr./ Capitol Dr.	\$155,750	4.45 (2 lots)	\$35,000	5-15-15	RP5, LLC

These two transactions resulted in the sale of 7.33 acres for a total of \$270,950 which exceeds the 2 acres for \$80,000 estimated in the 2015 budget.

9. Community and Economic Development staff received notice from Vetter Denk that they are withdrawing from development of the Foremost Site on John Street. Reasons cited include:
 - a. Market rental rates in Appleton
 - b. Lower density required for this site
 - c. Tow house/town house building format expense
 - d. Developer funded Tax Increment Financing (TIF) challenges for financing
 - e. Limited amount of resources offered to fill gap

While we worked long and hard to identify creative solutions to these challenges, the fact remained that the costs for the development continued to significantly exceed the resources available. Repeated cycles of design, engineering and bidding the project still could not close this gap even though the Appleton Redevelopment Authority/City had already committed up to 20% of the development increment value (estimated \$1,400,000) from TIF District #8 to support this proposed development. The next step is to issue a new Request for Proposals (RFP) to a broader audience in the summer of 2015.

10. While not in TID #8, the \$10 million Woolen Mills Loft project at 218 E. South Island Street was awarded WHEDA tax credits in May 2015 to complete a historic rehabilitation of the building that will create 60 new apartments units along the Fox River. Woolen Mills will include 36 units for moderate-income workforce housing, 15 units for veterans and will include veteran services, and 9 units will be rented at market rate.
11. TID #9 in the Wisconsin Avenue and Meade Street area saw significant progress on its first development project with the on-going construction of a 50 unit residential redevelopment called Union Square at the former Eagle Supply & Plastics property. WHEDA tax credits supported the conversion of this brownfield property into a neighborhood.
12. The City has conducted four business retention visits as of mid-year 2015; two visits were in conjunction with the Fox Cities Regional Partnership.
13. The City approved a one-year extension of the Memorandum of Understanding for the Market Garden in Southpoint Commerce Park with the Community Garden Partnership. The growing season is well underway with the goal of teaching gardeners to grow at an economically sustainable level.
14. In May, to promote preservation efforts, the City of Appleton Historic Preservation Commission hosted a public dedication ceremony for a Wisconsin state historical marker commemorating the Vulcan Street Plant Replica Building. The Vulcan Street Plant Replica Building is one of the earliest examples of a hydroelectric plant that sold electricity commercially and provided incandescent lighting service to the public. Approximately 30 people attended the event as well as Fox 11 News which aired a news story about the event and building's history.

15. In 2015, the Historic Preservation Commission revised the “City of Appleton Historic Preservation” brochure. The brochure highlights historic designated districts in the City, business and homeowner historic preservation tax credit and grant resources, explanation of why historic preservation is important as well as a smartphone QR code linking to the City of Appleton website for more information about walking tours and historic preservation. The brochure has been placed in City Hall and has been available on the City website.
16. Under the continuing work of City staff, the 1978 and 1989 City historic sites inventory data (paper copy) of 155 properties has been entered into an electronic data base. Staff conducted and completed additional historic research of the properties and wrote a historic narrative that included information relevant to each building’s history and/or architectural attributes. In the coming months, photographs of every building/site in the survey will be taken and linked to each historic property in the electronic database.
17. The Department staff processed, wrote and managed the following amendments: 1) Floodplain Ordinance on behalf of the Department of Public Works, Engineering Division. The Floodplain Ordinance amendment related to the City of Appleton Kensington Pond Dam Break Analysis Hydraulic Shadow. 2) Created new definition for the term Canopy, Chapter 23 Zoning Ordinance. 3) Created new standard to allow painted wall signs on buildings.
18. The Department staff approved projects through the site plan review process that included 142 new multi-family dwelling units, approximately 130,000 square feet of medical office space, 44,000 square feet of industrial space, and 52,200 square feet of commercial space.
19. Final Plat approval resulted in the creation of 40 residential lots.
20. Diversity Coordinator collaborated with organizations and churches working on issues of race and ethnicity in the Fox Cities to provide community town halls and forums in order to support marginalized community members and to gather information on how we can be a more welcoming community.
21. Diversity Coordinator continued strong partnership with World Relief and State of Wisconsin Refugee Resettlement office as we resettled refugees in Appleton. In 2014, we resettled 35 refugees in Appleton and as of August 2015, we have resettled 36 in Appleton. As a community, we are finding strong solutions to long-term success of refugees including new job and language programs.
22. Diversity and race relations and history continued to be highlighted for Appleton with the release of a documentary from Lawrence University and a national PBS program highlighting our Juneteenth program.
23. Staff continues to promote competitive grant funds available to registered neighborhoods. In early 2015, staff delivered a presentation at the “Strengthening Communities: Neighborhood Planning, Capacity Building, and Participation” regional mini-conference. Also, the Neighborhood Grant Program had its first grant approved by Council on February 18, 2015.

This grant is for \$70,000 and was awarded to the “Huntley Houses Neighborhood” to add a community fitness playground to the Huntley School grounds.

24. The City was notified by HUD in March that the 2015 CDBG allocation for the City of Appleton is \$523,813. Common Council approved the following funding amounts:

- City of Appleton Housing Rehabilitation Loan Program - \$175,000
- City of Appleton Neighborhood Program - \$40,000
- Community and Economic Development Department Administration - \$10,000
- Finance Department Administration - \$10,000
- Fair Housing Center of Northeast Wisconsin - \$22,000
- Appleton Housing Authority - \$60,000
- Fox Valley Warming Shelter - \$15,000
- Greater Fox Cities Area Habitat for Humanity - \$77,242
- Harbor House - \$24,000
- Homeless Connections - \$15,000
- Housing Partnership of the Fox Cities - \$31,000
- Rebuilding Together Fox Valley - \$20,000
- STEP Industries - \$24,571

25. The City of Appleton Homeowner Rehabilitation Loan Program rehabilitated twelve owner-occupied homes, and spent \$184,349 on home improvement loans. In addition, low-income neighborhoods were notified via a direct mailing that they were eligible for an exclusive application cycle that took place in June. During that time, over 30 applications were submitted and are currently being processed for program eligibility.
26. An out-of-court settlement was reached with Walgreen Company on four of their stores following the Walgreens court decisions in Oshkosh and Little Chute. This ends a four year Excessive Assessment claim from Walgreens and avoids a lengthy court trial.
27. All 25,000 electronic building sketches were completed in May to meet the 2015 state requirement for electronic property records. The building sketches are available to all on my.appleton.org and the Intranet Property Lookup.
28. The GIS Team successfully configured a new GIS server and installed GeoEvent Processor software. This software allows for real-time data capturing and notification tools. The team is currently working on integrating the AVL (automatic vehicle locator) data for our DPW fleet vehicles into a GIS application allowing management staff to view assets in real-time.
29. Another new server was set up and configured to be a “go between” server for applications that need to function for both the public use and for internal City users. This server is structured to allow data to be pushed out to the public through our existing web server, yet adds another layer of security by not allowing outside users to access internal City data. Using this new server structure, the team has reconfigured the Work Zone Tracker into a mapping application that not only allows City staff to easily input data about road

construction around the City but also publishes that data live to the internet for the public to see. This app will replace a text based report with an easy to read and understand map.

30. The recycle cart/garbage cart mobile application went “live” during the first half of 2015. This application allows our field staff to swap out existing carts for different sizes, make repairs to carts and place new carts at properties. This data then all syncs back to a GIS Server and is then processed to the ISeries into the container maintenance module, where billing can take place. This was an extensive project that was modeled on the successful water meter replacement program that transitions City workflows from a paper environment to a digital environment creating efficiencies throughout the entire cart system.
31. An internal GIS web application was developed to allow staff to have easy access to street excavation permits and street occupancy permits. This data is entered into the ISeries and is being exported nightly to GIS where the permit locations are then plotted on a map. City staff can now very quickly search the entire City to see what permits are currently active and then view the actual permit document to see additional details.
32. The City is in the process of updating the Emergency Operations Plan and the GIS staff has been involved with incorporating new tools officially into the plan. There are 2 GIS tools that the City will use in a large storm event. These tools allow for quick collection of damage reports from the public and easy reporting of damage to the County for FEMA funds.
33. The GIS team created a secured service and editing application for the Fire Department to conduct asset management tracking. This management system will better enable the Fire Department to deploy emergency staff more rapidly and precisely by knowing locations of fire department connections (FDCs) and knox boxes before they get to the site.
34. Working in conjunction with the Health and Park and Rec Department to create a Prescription (Rx) Trail site that will enable local physicians to not only prescribe medication but also physical activity. The GIS Team created an application that allows the client to have three choices when creating an Rx Trail. One, using a predefined Rx Trail; second, using the Auto Loop Generator; and third, using the Create Your Own route.
35. Using GeoEvent Processor, a web application was created to engage the public by allowing them to collect and report back to the City damage they discover in City parks. The application is a simple five-question form that enables the client to add a picture of the item and will pinpoint the client’s location upon loading of the application. Once the report has been submitted, this will trigger processes to run in the GeoEvent Processor, such as automatically emailing the client to say thank you for submitting the report and emailing the correct supervisor with information about the damage.

2015 Mid-Year Budget/Actual Comparison:

Community Development Budget/Actual Comparison			
<i>for the period ending June 30, 2015</i>			
	Current YTD Actual	Current Year Amended Budget	% of Budget Expended
Administration	\$118,951	\$257,015	46.3%
