January 22, 2016

Dear Mr. Cain,

On January 5, 2016 the City of Appleton's Health Department received your Residential Beekeeping Permit application.

As part of the residential beekeeping permitting requirements, the Health Officer must notify all property owners located within 400 feet of where a proposed aviary will be kept of a permit request. If a notified property owner objects to a permit being granted, he/she may file a written objection with the Health Department. Should the Health Department receive an objection, the application will be denied.

This letter is to serve as notice that the Health Department has received at least one objection to your permit request and therefore your application has been **denied**.

You may appeal this decision to the Board of Health within thirty (30) days from the date of this letter. Should you choose to appeal this decision, please send your request in writing and to my attention. The Board will allow you and any objectors an opportunity to be heard as to why the permit should or should not be issued. The Board will affirm, modify or set aside the denial after the hearing on the matter. You will be notified of the day and time the matter will be heard.

Should you have any questions about this letter, please feel free to reach me at 920-832-6429.

Respectfully,

Kurt Eggebrecht
Health Officer
Appleton Health Department
