Date: 06/21/21
To: Chief of Police Todd Thomas
From: Sgt. Chris Biese – Community Liaison Officer
Regarding: Core’s Lounge Noise Allegations

Chief Thomas:

I have been requested to provide information regarding the noise complaints related to **Core’s Lounge, 1350 W. College Avenue**. There have been several calls for service at this location for allegations of loud noise dating back to 2019, according to the information I have been provided.

In my conversations with some of the residents expressing the concerns, I was told this property was originally not zoned for alcohol sales; however, the residents in the area approved it for a wine bar. This establishment has moved and now the property is a bar, or nightclub, type of business.

The typical time for the calls for service has been around 2300—0200 Hrs. The complaint is typically focused on loud bass music coming from the building, which is a steel, multi-unit commercial building.

Captain Freeman worked with APD Records to obtain reports and data from 01/01/20 until the present to share with the Common Council.

Complaint History

There are 61 calls for service for noise complaints at 1350 W College Ave. For these 61 calls there are the same three names listed as complainants. These three citizens live in the area north of Core’s Lounge, a satellite view of the neighborhood with the addresses is included on page 3. Seven of the calls are *anonymous* or *no complainant* is listed.

Callers (several listed as first name only in the call)

- Amy Annen (1344 W Washington): 22 calls
- Joanne Kizewski (1339 W Washington): 24 calls
- Jane Kampf (1347 W Washington): 8 calls
- Unknown/Anonymous: 7 calls

The municipal ordinance most easily applied is the “75-foot rule”, which is city ordinance 12-87;

“Sec. 12-87. Radio or other electric sound amplification device – prohibited. No person or business may use a radio or other similar electric sound amplification device so that sound emitting from said radio or amplification device is audible under normal conditions from a distance of seventy-five (75) or more feet.”

Under the legal advice of Assistant City Attorney Glad, the noise beyond 75 feet must still be reasonably audible to be enforceable and to issue a citation for a violation of 12-87,

Some key points regarding our involvement in this:

- APD and Appleton Department of Health have met with the business in the past and employed use of a decibel meter. It was noted by Sgt. Ryan that the only time the sound was a concern was when it was set at its maximum volume.
- The owners were eager to meet with us to try to resolve the issue.
- Officers have asked the business, as a courtesy, to turn down the music when a violation was not established and, despite not being required to, they complied.
- Officers have been assigned to park and monitor the area to try and detect any violations before complaints came in.
- A request has been made with the dispatch center to not send calls over the radio (to address any possibility of a scanner in Core’s Lounge).
- I have had multiple phone conversations with the callers. One caller expressed concerns of hearing music in her room. I requested that she take the officer to where she hears the noise in her house, but she will not do so. (Note: one earlier report notes she did accommodate this, and the reporting person concurred with the officer that the noise heard was not a violation).
- Captain Frisch and I have had conversations with Alderperson Smith about this concern.
- Officers have deployed various types of sound measurement tools and have found readings in the 35-50db range, under the levels allowed by ordinance in a residential district.
- Several times, when noise could be heard, the officer had to be within approximately ten feet of the building to hear it.
- Rarely, some noise could be heard at distances beyond 75 feet, however it was not determined to be reasonably loud enough to allow for a citation. (One citation had been issued in late 2019, 45 demerit points were assessed).
- Several times we used tactics to avoid the business knowing of our presence (by responding to Washington Street first, not dispatching the call over the radio, etc.).
- Of the 61 calls only two appear to have risen to a level where officers could have possibly taken enforcement action, both occurring in 2020. The bar was cooperative each time and turned down the volume.

Neighborhood Canvas

On 06/17/21 during the late morning hours, Captain Freeman and I conducted a random canvass of the 1300 & 1400 blocks of W. Washington St. Our conversations with residents were based on a general overview of quality-of-life concerns. As people spoke of some concerns (speeding, potholes, etc), we eventually asked some more direct questions about this issue. **Nobody identified the music noise as a concern, some of whom live as close to Core's Lounge as two of the primary historical complainants.**

The following are the comments of different neighbors of the business:

- Only concern is foot traffic in the yards. When asked, noise from the retail area was not a concern. Resident for 17 years.
- Concern is homeless foot traffic. When asked about noise, only vehicle noise noted. Individual sleeps with windows open and does not hear Core's Lounge music. Resident for 2 years.

- Concern is bicycle and foot traffic. Occasional street racing noise on College Avenue. Home all the time. When asked about Core's Lounge, he replied she "didn't even realize there was a bar there." Resident since end of March 2021.
- Concern is potholes. Person is very close to Core's and never voiced a concern. When asked about the noise they said they know some people, indicating the known complainants, notice it but they do not.
- Citizen has lived in their house for 7 years, all is well – occasional traffic and racing-like noise on W. College Avenue but no Core's Lounge noise concerns.
- Citizen who has lived there for 4 years – knows other neighbors have an issue with Core's Lounge noise but has not heard anything. They did mention that Little Caesar's staff sometimes has friends in their parking lot with loud stereos, but that is very infrequent.
- Citizen who has lived very near Core's Lounge location for 10 years. They know some neighbors have issues with Core's, but this person does not hear it. This person reports hearing noise from the bar when returning home later at night but described it as "reasonable." This person told me Tandem Wine Bar was a noise issue when it was there.
- We knocked on 5-6 other doors without making contact.

Specific Calls and Actions Taken

These provide examples of efforts made by APD and the observations of some officers.

- **A21019776:** "...Sound was barley heard, and there was no loud bass. I went around the building itself and only noticed the sound once I was within five or so feet of it. At no point was any loud bass heard. There was no noise violation and no reason to tell them to turn down the music..."
- **A21017891:** I heard several patrons leave the bar, and their voices could be clearly heard. I could not hear any music. I then parked near the parking lot for a time, and I could not hear anything over the passing traffic on College Ave.
- **A21010948:** I was requested by Lt. Berkley to address any potential noise violations that were a reoccurring issue at Cores' Lounge located at 1350 W. College Ave, in the City of Appleton. On 3/26/21 from the hours of 2320 to 0020 I sat directly in front of 1345 W. Washington St, which was directly behind Core's Lounge. I sat within my squad with the windows down and periodically exited to assess any noise omitting (sic) in the area. Inside the squad with the engine running while I kept it warm, I was not able to hear any sound from Core's. When I exited, I overheard the occasional bass note emanating from Core's, but it was extremely faint and not even close to be considered a violation. I was not able to clearly identify specific music being played inside the building, and only heard the faint bass note time to time, but it was not a constant issue.

As I stood upon the sidewalk of Washington St and even within my squad, I was able to hear the passing of vehicles on College Ave louder than any noise coming from within the bar. There were also few individuals who stepped outside the back around 2351 hours, and I was able to hear their voices clearer than any music from the building.

Shortly after midnight, the resident of 1339 W. Washington St approached my squad to tell me that the lack of noise was unusual, and it was louder before I arrived. She claimed that the occupants of Core's knew I was sitting on the road. I found this unusual as my squad was blocked by the residence of 1345 W. Washington St, and nothing was dispatched over the radio to indicate I was here. She admitted to me that she was unable to hear anything where my squad was parked, which typically did not happen, and it was much quieter. I informed her that I would continue to monitor the situation.

I think with this reoccurring issue, it is possible it's not the music level itself within the bar, but the bass reverbing off the sheet metal walls. With what I observed over a span of an hour, I would be unable to enforce any violation.

- **A21010048:** On 3/20/21 at approximately 00:55 hours, I, Officer Shuman #9173, was dispatched to the address of 1350 W College Ave, Core's Lounge, for a noise complaint. I **was already on scene for the complaint**, as I had been directed by LT Del Plaine #9156 to conduct extra-patrol in the 1300Blk of W Washington St for numerous previous complaints of loud music coming from the bar.

I responded to the area at approximately 23:40, and placed myself on a community policing status. At approximately 00:07 hours I performed foot patrol in the area and overheard no loud noise coming from the area of the bar. I walked down several driveways in the area and could not hear any music at that time. I returned to my squad car and worked on several reports with my windows open. During this time I heard the a door open to the bar and someone threw away several glass bottles into a dumpster. This was the only loud noise I heard until I noted that dispatch had screened up a noise complaint for the bar at approximately 00:55. Prior to them dispatching the call over the air, I exited my squad car and walked through the driveway of 1347 W Washington towards the bar. I continued to walk towards the building until I was approximately 6-10 feet from the backdoor to the bar, where I could begin to overhear some music from inside.

I called the RP back and spoke with her shortly. Jane advised that the noise had been going all night, which she described as "bass thumping." I described to her that I had been on scene for a long time and had not heard anything. Jane questioned whether she should call in complaints or not. I informed her that she should call about issues she has in the community, but understand that we many (was this "may" in original) not have the ability to make any changes if the volume was the same as it was tonight.

Jane explained that her neighbor has a worse experience and that she usually hears it more by her house, (1339 W Washington.).

I later was able to walk around the property of 1339 W Washington, and while the noise from the bar is louder on the East side of Core's lounge, the music did

not extend to the backyard of 1339.

I informed Jane that possibly it was quieter tonight than usual, but it was far from a violation.

I noted during my entire time on scene that passing traffic on College Ave was the predominant source of noise, and that even while standing behind the bar and listening for any type of music, I could always hear traffic passing by on College Ave over any other noise.

END OF REPORT

Upon my return to duty on 3/20/21, I, Officer Shuman #9173, was advised by Lt del Plaine that the front desk staff had advised that Jane had told them that the music had started as soon as I pulled away from the house the night, she called in the complaint. I briefly listened to the beginning of the call, and overheard Jane tell the front desk that the music coming from the bar had gotten louder once the officer left the area.

I asked the front desk staff to save the call for future use.

I re-watched my recording of speaking with Jane, and noted that she was unaware that I had not left the area while first speaking with me. She referenced coming outside while I was on scene, and not being able to hear anything. She then said that the music was turned up later in the night prior to her calling. I was on scene the entire time she refers to, and never left the area. At no point did I leave the area of the 1300Blk of W Washington St, and at the time of her calling I was parked with my windows open directly in-front of her house. I noted no change in music volume, and was unable to hear anything while on or near Jane's property.

On 3/20/21 at approximately 23:56 hours, I Officer Shuman #9173, was advised by the front desk that they had received a call from the resident of 1344 W Washington St about loud music coming from Core's Lounge. I had been on scene in the 1300Blk of W Washington St for approximately 45 minutes, as assigned by Lt Del Plaine. I had noted upon foot patrolling the area that the music coming from the bar was audible from the back fence line of 1339 W Washington St, which borders the bar's property line. This music was only audible if I stood still and listened closely. Any other noise nearby, such as a dryer vent or furnace turning on drowned out the sound of any music able to be heard.

While on scene I was able to hear that the noise from the bar would increase drastically when the side door on the east side of the building was opened or when people were out in front of the bar, but this noise was always temporary and ceased when the doors shut.

I spoke with Amy over the phone, and she advised that while she was able to hear the bass or rhythm line of the music from her house at 1344, she did note that the music has been substantially louder in the past. In speaking with Amy, she noted that the music, specifically the bass line, at the time of speaking with me, was audible if she stepped out onto her porch. I listened as she was speaking, and from my squad car I was unable to hear anything from the bar. While speaking with her for approximately 40 minutes, I heard several people exit the bar, and once I was able to hear what sounded like a bass line from a song. This noise was not overly loud, but present. My vehicle was parked what I would approximate as around 150 feet from the property line of the bar. This noise lasted for approximately 30 seconds to a minute, and ceased, it never raised to the point of being audible over the noise from traffic on College Ave.

The loudest noise I heard while on scene were patrons leaving the bar, many of which were loud and boisterous. They often cheered and yelled loudly, but left in intermittent intervals and were not consistent. Their conversations were loud enough for me to clearly understand what they were saying when speaking in English. I was unable to understand other conversations due to the foreign language being spoken, but it was loud enough for someone who speaks the language to hear.

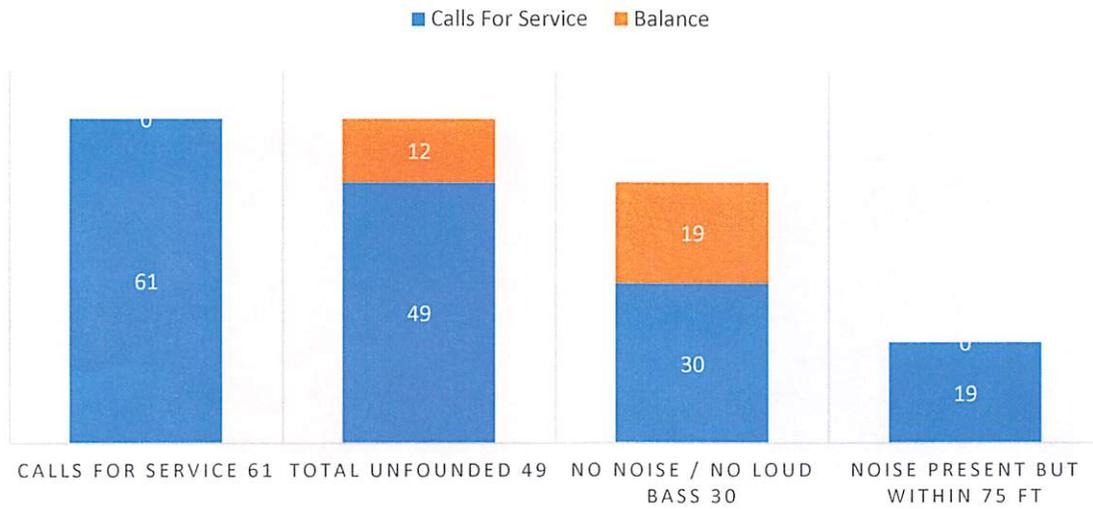

Here is the information on the 2 (two) complaints that were *potentially actionable*, based on the details in the call:

- **A20015788:** 05/23/2020. Nou and several bar patrons were playing music too loudly for the local neighborhood. The music could be heard from approximately 1 1/2 blocks away, outside of local noise variance. Nou was verbally warned.
- **A20044773:** 12/19/2020. Noise complaint at Core's lounge where I could hear the music clearly from neighboring driveways to the north. I spoke with staff who were compliant in turning the music down. Sgt. Ryan notified due to ongoing issue with neighbors and business.

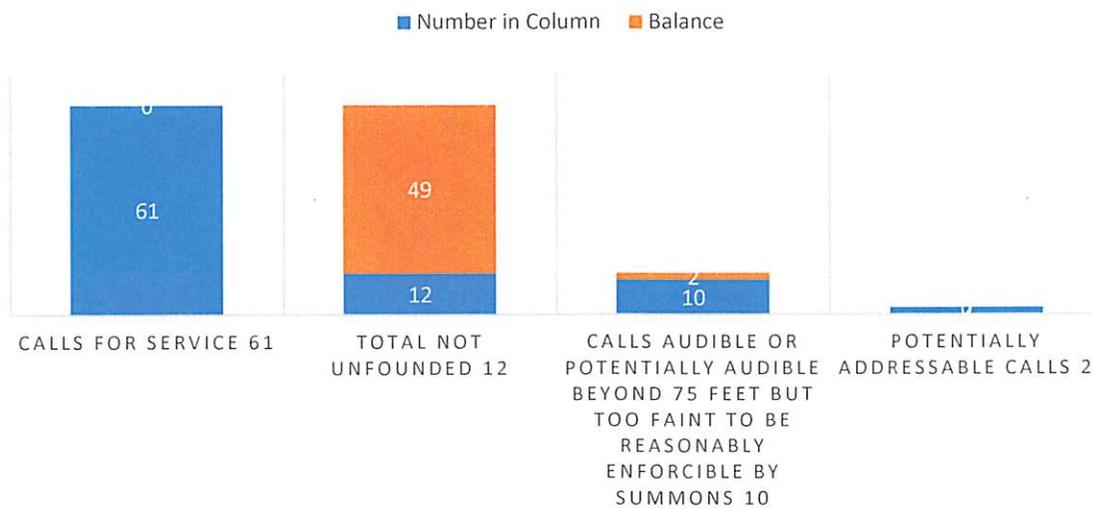

I am hoping this provides some information to help show our efforts and observations. There were two instances last year when officers possibly observed excessive noise but felt it appropriate to handle the situation with a warning and working with the cooperative business. This is consistent with department expectations and how these complaints are handled with other businesses in other locations in the city. As noted, most residents in the immediate area did not feel Core's Lounge was a source of disruptive noise.

Data from review of reports of noise at Cores Lounge since 01-01-20. Due to a number of variables in information documented and interpretation of data, numbers should be considered an approximation.

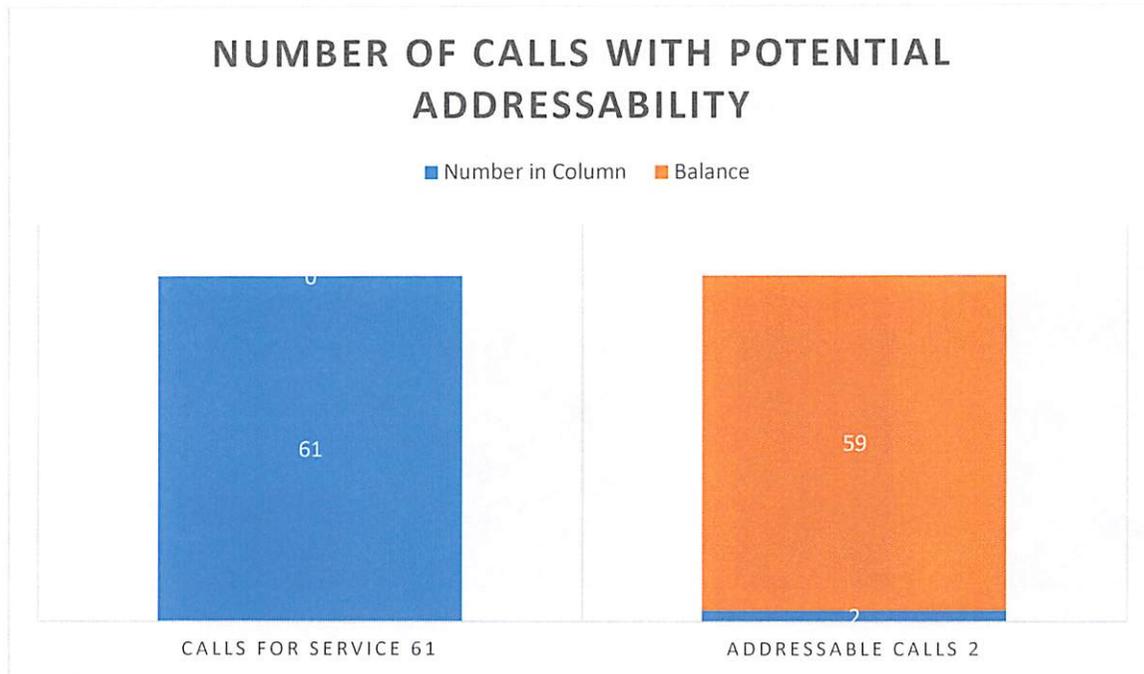

BREAKDOWN OF CALLS DEEMED UNFOUNDED

BREAKDOWN OF CALLS NOT DEEMED UNFOUNDED

Narratives

Original Narrative

01/04/2020 19:33:25

On 1/3/2020 at 2225 hours, I, Officer Jason Schmitz #9115 was dispatched to Core's Lounge located at 1350 W. College Ave, in the City of Appleton, Outagamie County, Wisconsin for a noise complaint. This business has been subject to numerous other recent noise complaints by the same complainant (A19044988; A19045891, A19046178, A20000270). All were unfounded. Dispatch

advised there was loud music emitting from the exterior of the building, which the complainant could hear from the second story within her residence.

I arrived on scene and walked around the exterior of the building. I heard music within the building while I stood from a few feet away, but the level was appropriate and did not seem to be a disruption. The only sound I was able to clearly hear was occasionally the bass from the music. There were no exterior speakers attached to the building.

I downloaded a Sound Level Meter app on my phone. Obviously, the true accuracy of the app is unknown, but within a few feet away from the building in the back, the app registered between 43-48DB. Loud talking and laughter within the building was louder than the actual music. In the front of the building, the app registered between 40-46DB.

I walked to the driveway of a residence directly behind the business. In the middle of the driveway, near the residence itself the app registered between 34-37DB. In comparison, while exiting my squad the closure of my car door registered around 80DB.

I stood outside for several minutes, and only heard the occasional bass note emitting from the business. The sound was at a low level, and I did not observe any violation for loud or excessive noise. I attempted to call the complainant, but I did not receive an answer. I later heard back from the complainant who stated that the noise was now turned down and she could no longer hear the music.

The complainant asked me several times if she was the only one who called in the noise complaint. I informed her she was, and the front desk received a phone call from someone else reporting the issue moments after I ended my conversation with the original complainant.

No violation observed. Due to the on-going issue, report was completed for record.

ARREST / CUSTODY INFORMATION:

None.

CASE STATUS:

Cleared with report.

End of Report.

Jason Schmitz #9115.

Sgt Pieper reporting. Upon arrival the bar was closed with the lights on inside. I walked around the outside and heard only faint music when I was right up close to the back door. When I moved away from the door by about 10 feet I could no longer hear the music. This complaint was unfounded.

Sgt Rohm #9194 Reports:

On 01/10/2020 at approximately 2324 hours, I responded to 1350 W College Ave (Cory's Lounge) for a report of loud music. Prior to responded to Cory's Lounge I responded to [REDACTED] to make contact with the reporting party, Joanne Kizewski. Upon arrival Joanne invited me into her residence so I could hear the music from where she heard it. I could hear a faint sound of music, but it was not in violation for city ordinance. Joanne did not disagree with my assessment and said it was much louder before I arrived.

I made contact with Kor Xiong who is the owner of Cory's Lounge. I asked that the bass be turned down to avoid prior complaints. Kor agreed to turn the bass down and was cooperative.

No enforcement action taken.

Narratives**Original Narrative****01/12/2020 23:08:00**

On 01/12/2020 at approximately 2225 hrs., Ofc. Allen and I Ofc. Corbett responded to a noise complaint at Core's Lounge (1350 W College Ave). The reporting person stated that they could hear music from inside their house. The reporting person was later identified to be Amy Annen over the phone.

I spoke with Amy over the phone who stated that at approximately 2215 hrs., she and her daughter could first hear music in their house coming from Core's Lounge. She stated that she could primarily hear the bass of the music and felt it in her house. Ofc. Allen advised me that before I arrived on scene, he was sitting on W. Washington behind the business, but could not hear the music. I also did the same thing some time later and also was not able to hear the music. Amy advised that the music volume seems to fluctuate a lot and usually doesn't stay very loud when police arrive.

I told Amy that this incident would be documented for future use. I also advised her to call the police again if the music becomes an issue again in the future.

No law enforcement action taken at this time

NOTE: I sat in the parking lot of Core's Lounge while typing this report. Could not hear any music during that time.

END OF REPORT

OFFICER BOTZ REPORTING:

On 01/13/2020 at approximately 0231 hours, I responded to Core's Lounge located at 1350 West College Ave in the City of Appleton, Outagamie County for a report of a noise complaint. Prior to my arrival on scene, dispatch advised that a female reporting party called stating that there was loud music coming from the business and that this was a continual problem.

When I arrived on scene at Core's Lounge, I observed the inside of the business to be dark, empty of any people, and no music or noise coming from within business. Next, I made phone contact with the reporting party who verbally ID herself to me as Amy R. Annen. When speaking with Amy, she stated that she had heard loud music coming from the business prior to calling police. Amy also said that the loud music is typically more noticeable when you stand on the northside of the business. I asked Amy if she was hearing any noise coming from the business at the time of our phone call and she stated she could not.

After hanging up the phone with Amy, I drove around to the north side of the business and confirmed that there was no loud music or sound coming from that area of the business as well.

Narratives

Original Narrative

02/07/2020 21:04:50

On 02/07/20, I Ofc. McCord of APD was working uniform patrol in the downtown district. At 2048 I was dispatched to 1350 W College Ave (Core's Lounge) for a noise complaint. Upon entering the area, I sat nearby and listened for any noise coming from the business. I could not hear any noise coming from the business. I drove through the parking lot and still could not hear anything.

End of Report.

Ofc. McCord #9188.

I arrived on scene and could hear music coming from Core's Lounge. I was parked approximately 25 feet away and could barely hear the music. Based on my previous experiences I did not consider the music level to be excessive. I attempted to contact the RP by phone but she did not answer.
End of summary report.

Original Narrative

02/27/2020 23:39:35

I responded to Core's Lounge and parked approximately 25 feet away from the building. I could hear no noise emitting from the building. I contacted the RP, Joanne, who expressed a tremendous amount of frustration, stating that she's not crazy and the music was quiet now but had been shaking her house. I spoke with Joanne on the phone until she hung up on me and said she would call Sgt. Ryan in the morning. End of summary report. Axon 9128.

Narratives

Original Narrative

02/28/2020 23:30:44

Sgt Pieper reporting. I responded to Cores Lounge for a noise complaint. I have responded to other noise complaints at this location and have never found a violation of the noise ordinance. I drove down Washington St and parked at Washington/Outagamie so no one at the location would see me approach. I walked first up to the rear of the building and heard no noise until I was just outside the rear door and even then the sounds coming from inside were very quiet and muffled. The noise from traffic on College Ave was much louder than any sounds coming from the building. I then went to the front and once again there was minimal noise and nothing that violated the city noise ordinance. There were no patrons or staff outside in the rear or back of the building.

Original Narrative

03/08/2020 20:57:11

SUMMARY:

Noise level was never above 42dB. Traffic from College Ave was louder. There was a continuous bass tone that played throughout my time outside the business. Joanne confirmed this is what keeps her up at night and gives her headaches. Will follow up with CLO regarding additional follow through options, potentially Health Department measuring the levels created by the bass. END #9106

Original Narrative

03/14/2020 01:24:21

On 03/14/2020 hours I, Ofc. Kantner #9121 , was assigned to a noise complaint at 1350 W. College Avenue for Core's Lounge. Upon arrival I drove through the parking lot and came within 15ft of the front door and could not hear any music or noise coming from Core's. I remained in the parking lot for approximately 10 minutes and heard nothing out of the ordinary.

Narratives

Original Narrative

05/23/2020 02:15:13

Nou and several bar patrons were playing music too loudly for the local neighborhood. The music could be heard from approximately 1 1/2 blocks away, outside of local noise variance. Nou was verbally warned.

SUMMARY

On 06/10/20 at 21:05 I was dispatched to 1350 W. College Ave. for a loud noise complaint. Upon arrival I could barely hear music being played from the inside of the bar while standing outside of the door - well within ordinance compliance.

A bar walkthrough was conducted and no violations found.

Narratives

Original Narrative

06/21/2020 19:55:58

I, Officer Paul Christensen, was working as a uniformed patrol officer for the City of Appleton Police Department on 06/20/2020 working from 1500 hours to 0300 hours in the downtown district operating marked squad 1011. At approximately 0040 hours I responded to Core's Lounge located

at 1350 W. College Avenue in the City of Appleton Wisconsin, in Outagamie County, in regards to a noise complaint.

I was aware of multiple unsubstantiated noise complaints for Core's Lounge in the past. Upon arrival to Core's Lounge I observed the faint sound of music from within while I was just outside of the entrance. It should be noted that the traffic from College Avenue was louder than the music from within Core's Lounge. I did not observe any noise that was excessive and did not take any further action.

End of summary

Narratives

Original Narrative

08/30/2020 23:34:14

Screen notes:

23:15:57 08/30/2020 - GALLAGHER S
Cores Lounge music is too loud RP is 110ft away from lounge.

Summary:

Upon arrival within the parking lot, I did not observe any noise while I was in my squad. I completed a check around the perimeter of the building on foot. I traveled out back, to the point where I was within a foot or so away from the exterior door and there was absolutely no noise. Vehicles on College Ave were able to be heard louder than any noise within. There was no evidence to establish any noise violation. Axon activated.

End of Report.

Jason Schmitz #9115.

Narratives

Original Narrative

10/01/2020 23:06:14

Sgt Pieper reporting. On 10-01-20 I was dispatched to Cores Lounge for a noise complaint of loud music. I drove on Washington St and parked out of sight of the location at Outagamie/Washington. I walked from there on foot. I could not hear ANY music where I parked. I walked up to the NW corner of the building and paused listening. I could not hear any music. I walked along the back of the building pausing to listen several times eventually stopping at the rear door to the lounge. I did not hear ANY music at any of those locations. I walked around the east side of the building and finally could hear faint music when I was at the SE corner of the building. This music was not loud and a normal conversation would have been much louder and passing traffic on College Ave was much louder than the music I could hear. I went inside and checked their master volume. I could not see any marked spot that had been discussed in the Captain's email. I spoke to staff who were friendly and explained why I was there. There was clearly NO violation during this incident.

Narratives

Original Narrative

01/17/2021 01:21:55

Officer Christensen Reporting:

I, Officer Paul Christensen, was working as a uniformed patrol officer for the City of Appleton Police Department on 01/15/2021 working from 1500 hours to 0300 hours in the downtown district operating marked squad 1011. At approximately 0100 hours I responded to Core's Lounge located at 1350 W. College Avenue in the City of Appleton Wisconsin, in Outagamie County, in regards to a noise complaint. I am aware of on-going noise complaints associated with Core's Lounge.

Upon arrival to Core's Lounge I parked in the parking lot and rolled the windows down in my patrol vehicle. I observed that I was barely able to hear the music inside of the bar when parked just outside of the building. I made contact with the reporting person, Amy Annen. I asked Amy if she was still able to hear loud music coming from Core's Lounge. Amy stated that she could no longer hear any noise from Core's Lounge while inside of her residence. Amy stated that she would call back if the music once again rose to a level where she could hear it from her residence.

Arrest/Custody Information:

None.

Case Status/Disposition:

This case is closed.

End of report

Officer Paul Christensen #9101

Narratives

Original Narrative

03/14/2021 18:52:10

Officer Christensen Reporting:

I, Officer Paul Christensen, was working as a uniformed patrol officer for the City of Appleton Police Department on 03/13/2021 working from 1500 hours to 0300 hours in the downtown district operating marked squad 1011. On 03/14/2021 at approximately 0040 hours I responded to the area of Core's Lounge located at 1350 W. College Avenue in the City of Appleton Wisconsin, in Outagamie County, in regards to a noise complaint. Amy Annen had called the police department to report loud music coming from Core's Lounge. I am aware of ongoing noise complaints with Core's Lounge.

Upon arrival to the area I parked my patrol vehicle in the 1300 block of W. Washington Street, which is the area where Amy lives. I turned off my patrol vehicle and listened for any indication of music coming from the area of Core's lounge. I believe that I could hear very faint music coming from the area, though I was not sure. I used a sound meter application on my cell phone to measure the noise in the area in decibels. The noise in the area maintained a steady rate at approximately 35 decibels. I observed that as vehicles drove through the area on College Avenue, the noise of the vehicles on the roadway measured a rate of approximately 50 decibels. I concluded that there were not sufficient grounds for a violation of excessive noise ordinance.

Arrest/Custody Information:

None.

Case Status/Disposition:

This case is closed.

Narratives

Original Narrative

03/20/2021 01:51:52

On 3/20/21 at approximately 00:55 hours, I, Officer Shuman #9173, was dispatched to the address of 1350 W College Ave, Core's Lounge, for a noise complaint. I was already on scene for the complaint, as I had been directed by LT Del Plaine #9156 to conduct extra-patrol in the 1300Blk of W Washington St for numerous previous complaints of loud music coming from the bar.

I responded to the area at approximately 23:40, and placed myself on a community policing status. At approximately 00:07 hours I performed foot patrol in the area and overheard no loud noise coming from the area of the bar. I walked down several driveways in the area and could not hear any music at that time. I returned to my squad car and worked on several reports with my windows open. During this time I heard the a door open to the bar and someone threw away several glass bottles into a dumpster. This was the only loud noise I heard until I noted that dispatch had screened up a noise complaint for the bar at approximately 00:55. Prior to them dispatching the

call over the air, I exited my squad car and walked through the driveway of [REDACTED] W Washington towards the bar. I continued to walk towards the building until I was approximately 6-10 feet from the backdoor to the bar, where I could begin to overhear some music from inside.

I called the RP back and spoke with her shortly. Jane advised that the noise had been going all night, which she described as "bass thumping." I described to her that I had been on scene for a long time and had not heard anything. Jane questioned whether she should call in complaints or not. I informed her that she should call about issues she has in the community, but understand that we may not have the ability to make any changes if the volume was the same as it was tonight.

Jane explained that her neighbor has a worse experience and that she usually hears it more by her house, [REDACTED] W Washington.).

I later was able to walk around the property of [REDACTED] W Washington, and while the noise from the bar is louder on the East side of Core's lounge, the music did not extend to the backyard of [REDACTED]

I informed Jane that possibly it was quieter tonight than usual, but it was far from a violation.

I noted during my entire time on scene that passing traffic on College Ave was the predominant source of noise, and that even while standing behind the bar and listening for any type of music, I could always hear the sound of traffic passing by on College Ave over any other noise.

END OF REPORT

OFFICER SHUMAN 9173.

Supplemental Narrative

**03/20/2021 23:50:57 9173 ANTHONY
SHUMAN**

Upon my return to duty on 3/20/21, I, Officer Shuman #9173, was advised by Lt Del Plaine that the front desk staff had advised that Jane had told them that the music had started as soon as I pulled away from the house the night she called in the complaint. I briefly listened to the beginning of the call, and overheard Jane tell the front desk that the music coming from the bar had gotten louder once the officer left the area.

I asked the front desk staff to save the call for future use.

I re-watched my recording of speaking with Jane, and noted that she was unaware that I had not left the area while first speaking with me. She referenced coming outside while I was on scene, and not being able to hear anything. She then said that the music was turned up later in the night prior to her calling. I was on scene the entire time she refers to, and never left the area. At no point did I leave the area of the 1300Blk of W Washington St, and at the time of her calling I was parked with my windows open directly in-front of her house. I noted no change in music volume, and was unable to hear anything while on or near Jane's property.

-

On 3/20/21 at approximately 23:56 hours, I Officer Shuman #9173, was advised by the front desk that they had received a call from the resident of [REDACTED] W Washington St about loud music coming from Core's Lounge. I had been on scene in the 1300Blk of W Washington St for approximately 45 minutes, as assigned by Lt Del Plaine. I had noted upon foot patrolling the area that the music coming from the bar was audible from the back fence line of [REDACTED] W Washington St, which borders the bar's property line. This music was only audible if I stood still and listened closely. Any other noise nearby, such as a dryer vent or furnace turning on drowned out the sound of any music able to be heard.

While on scene I was able to hear that the noise from the bar would increase drastically when the side door on the east side of the building was opened or when people were out in front of the bar, but this noise was always temporary and ceased when the doors shut.

I spoke with Amy over the phone, and she advised that while she was able to hear the bass or rhythm line of the music from her house at [REDACTED] she did note that the music has been substantially louder in the past. In speaking with Amy, she noted that the music, specifically the bass line, at the time of speaking with me, was audible if she stepped out onto her porch. I listened as she was speaking, and from my squad car I was unable to hear anything from the bar. While speaking with her for approximately 40 minutes, I heard several people exit the bar, and once I was able to hear what sounded like a bass line from a song. This noise was not overly loud, but present. My vehicle was parked what I would approximate as around 150 feet from the property line of the bar. This noise lasted for approximately 30 seconds to a minute, and ceased, it never raised to the point of being audible over the noise from traffic on College Ave.

The loudest noise I heard while on scene were patrons leaving the bar, many of which were loud and boisterous. They often cheered and yelled loudly, but left in intermittent intervals, and were not consistent. Their conversations were loud enough for me to clearly understand what they were saying when speaking in English. I was unable to understand other conversations due to the foreign language being spoken, but it was loud enough for someone who speaks the language to hear.

Officer Shuman 9173

Narratives

Original Narrative

03/27/2021 00:32:27

I was requested by Lt. Berkley to address any potential noise violations that were a reoccurring issue at Cores Lounge located at 1350 W. College Ave, in the City of Appleton. On 3/26/21 from the hours of 2320 to 0020 I sat directly in front of [REDACTED] W. Washington St, which was directly behind Cores Lounge.

I sat within my squad with the windows down and periodically exited to assess any noise omitting in the area. Inside the squad with the engine running while I kept it warm, I was not able to hear any sound from Cores. When I exited, I overheard the occasional bass note emanating from Cores, but it was extremely faint and not even close to be considered a violation. I was not able to clearly identify specific music being played inside the building, and only heard the faint bass note time to time, but it was not a constant issue.

As I stood upon the sidewalk of Washington St and even within my squad, I was able to hear the passing of vehicles on College Ave louder than any noise coming from within the bar. There were also few individuals who stepped outside the back around 2351 hours, and I was able to hear their voices clearer than any music from the building.

Shortly after midnight, the resident of [REDACTED] W. Washington St approached my squad to tell me that the lack of noise was unusual, and it was louder before I arrived. She claimed that the occupants of Cores knew I was sitting on the road. I found this unusual as my squad was blocked by the residence of [REDACTED] W. Washington St, and nothing was dispatched over the radio to indicate I was here. She admitted to me that she was unable to hear anything where my squad was parked, which typically did not happen, and it was much quieter. I informed her that I would continue to monitor the situation.

I think with this reoccurring issue, it's possible it's not the music level itself within the bar, but the bass reverbing off the sheet metal walls. With what I observed over a span of an hour, I would be unable to enforce any violation.

SUMMARY:

Officer arrived in the area of West Washington Street behind Core's Lounge to assess the noise level. Low bass tones could be heard, but when measured with a decibel meter application, the

noise level measured on average 31dB while stationary on the street without squad running. Noise from patrons leaving the establishment were notably louder but subsided within seconds. Traffic driving in the downtown area could be heard more clearly than any noise from the bar. The meter used, however, does not appear able to measure the bass tones, which appear to be the main issue at hand. Per Appleton municipal code, no noise violations could be observed with the equipment available and training provided to officer regarding observing noise violations. END #9106

SUMMARY

On 04/10/21 at 23:31, I responded to Core's Lounge at 1350 W. College Ave. for a noise complaint. Given the chronic complaints there and per previous command staff guidance, I initially responded to the North of the business to the 1300 block of W. Washington St. Below were the weather and wind conditions at the time of the complaint:

Wind Speed and Direction: 16.1mph, NNE
Temp: 49
Weather Conditions: light rain

From two positions on the 1300 block of Washington St., I could not hear any sound coming from Cores, and could only hear the ambient traffic and city noise. Upon approach to the back end of the business, I could only begin to hear any amplified music with any degree of clarity over the ambient city noise and rain within approximately 10 feet of the back door.

I then responded directly to the parking lot on the front (South) of the business. Again, I could hardly hear any noise coming from inside of the business until I was nearly on the sidewalk to the front entrance of the business. Under the guise of a license check, I spoke with the owner, CONTACT Kor Xiong, and found the noise level to be acceptable. Certainly there was no ordinance violation present. Information passed via e-mail to CLO.

END OF SUMMARY

Narratives

Original Narrative

04/23/2021 00:27:57

At approximately 23:51 hours on 04/22/21, I Officer Shuman 9173 was sent to Core's Lounge for a noise complaint. Dispatch did not give the address or location over the air. Upon my in the area of West Washington Street behind Core's Lounge, I noted that low bass tones could be heard, but they were very faint. Noise from patrons leaving the bar were notably louder but were infrequent

and also not overly loud. Traffic on College Ave could be heard more clearly than any noise from the bar.

No noise violations were observed and no further action was taken.

Narratives

Original Narrative

05/07/2021 01:34:27

Summary:

On 05/06/2021, at 2241 hours, I, Officer Lowe 9181 was dispatched to 1350 W College Ave. at the Core's Lounge for a noise complaint at this business. Upon my arrival I observed no loud music. I

attempted to call the reporting party back and left a voicemail.

At about 1250 hours, on 05/07/2021, I received a phone call back from Joanne. Joanne asked to only use her first name in the report. She contacted dispatch to report the loud music was going on again. Joanne said it only happened in burst. She said they would turn it up for about 5 minutes and then turn it back down. She was upset that she could not sleep. She said she lives 100 feet from the business and can hear it. I responded to the area and stood outside of the business, I could barely hear the music while I was there. I told Joanne I would document her concerns.

End of report.

Officer Lowe 9181.

Original Narrative

05/15/2021 23:22:22

Upon my arrival in the area I was unable to hear any loud noise in the general vicinity. After waiting for several minutes behind the location, I moved to the area to the West of the bar. I heard several patrons leave the bar, and their voices could be clearly heard. I could not hear any music. I then parked near the parking lot for a time, and I could not hear anything over the passing traffic on College Ave.

Screen notes:

23:23:05 05/27/2021 - CHRISTENSEN C

EDITED Loud music. Says it is loud bass and wants an officer to tell them to turn it down.

Summary:

Upon arrival, I initially sat in my patrol vehicle with the windows down. No sound was heard. I walked between the houses of [REDACTED] W. Washington St through the backyard toward the establishment. Sound was barely heard, and there was no loud bass. I went around the building itself and only noticed the sound once I was within five or so feet of it. At no point was any loud bass heard. There was no noise violation and no reason to tell them to turn down the music. This is a common and ongoing issue. Axon captured my findings.

End of Report.

Schmitz #9115.
