**Prospect Avenue**, from Seminole Road to Outagamie Street, be reconstructed with concrete pavement and curb and gutter. The dimensions of the Prospect Avenue reconstruction project are as follows:

*Seminole Road - Hillcrest Drive:* New concrete pavement to be constructed to a width of 37' from back of curb to back of curb, which is 3' narrower than the existing street within this portion of the project.

*Hillcrest Drive - Carver Lane:* New concrete pavement to be constructed to a width of 45' from back of curb to back of curb, which is 5' wider than the existing street within this portion of the project.

*Carver Lane - Outagamie Street:* New concrete pavement to be constructed to a width of 37' from back of curb to back of curb, which is the same width as the existing street within this

portion of the project.

New 5' concrete sidewalk will be constructed along the south side of Prospect Avenue, between Sunny Slope Court and Hillcrest Drive.

Prospect Avenue will consist of 1 travel lane in each direction, bike lanes along both sides of the street, and a two-way left turn lane between Hillcrest Drive and Carver lane (adjacent to Xavier High School). On-street parking will be eliminated along the entire project length.

The intersection of Haskell Street, Outagamie Street, and Prospect Avenue will be reconstructed and geometrically modified to provide a more standard T-intersection configuration. A dedicated left turn lane along Prospect Avenue will also be incorporated at this intersection as part of this reconstruction project.
